Introduction

1. Commitment to European values

The Republic of Serbia is fully committed to the process of European integration and aware that this process requires substantial and fundamental changes in the judiciary, the anti-corruption system and the protection of fundamental rights, both at the normative and the implementation level. In this sense, in the process of developing the reform steps in Chapter 23, Serbia was primarily guided by the EU *acquis*. In areas where there is no *acquis* or it does not cover the whole area, the established standards and best comparative practices were used as a guide for creating reforms, particularly considering the legal heritage of the Republic of Serbia, as well as socio-economic factors conditioning the applicability of the solutions that provide good results in other legal systems.

We have attempted to be completely objective in assessing the current situation in all three areas, and ambitious but also realistic in setting the goals, estimating the optimal balance between the needs reflected in the achievements of European standards, often tight deadlines, institutional and administrative capacity and limited financial resources.

In the process of drafting the Action Plan, it was helpful that priorities and courses of action were previously defined through a series of strategic documents in the areas such as the judiciary, anti-corruption, anti-discrimination, Roma rights, media freedom and the like. The Action Plan for Chapter 23 follows the course mapped out in these strategic documents, but also advances the process by defining objectives and activities for which the subsequent need arose or it was necessary to identify more detailed evaluation. In this sense, the Action Plan for Chapter 23 represents the overarching strategic document with which all the other strategic documents shall be aligned upon its approval. This shall enable precise definition of the public policy in this area, whereas implementation, coordination, timing and funding of the reforms shall be significantly improved.

The development of the Action Plan is a long-term process, due to the nature of the consultative process. Given that the extent of implementation of the reforms may somewhat differ at its beginning and finalization, it is important to note that the intersection of the situation in all areas is given as of 1 September 2014. The activities are planned accordingly, whereas any subsequent changes are indicated in the column displaying the implementation status of the activities, pursuant to the methodology presented in Annex I.

2. Methodology of drafting the Action Plan

In the process of drafting the Action Plan, the negotiating Group for Chapter 23 followed the principles of full transparency and inclusiveness. In accordance with these principles, the work proceeded in two tracks. The first track involved the activities common to all three subchapters, while the second track included work on the individual parts of the Plan on the judiciary, the fight against corruption and fundamental rights.

When it comes to activities common to the entire chapter, they included preparatory workshops in the field of methodology of drafting strategic documents, consultative meetings and workshops with the representatives of the negotiating groups of the countries in the region, as well as training in the methodology of budgeting action plans. In addition, the mechanism of the consultative process with civil society organizations has been created at the level of the entire chapter. Therefore, already in the period preceding the bilateral screening, civil society organizations were involved in making presentations on alignment of the legal system of the Republic of Serbia with the *acquis*. All civil society organizations were invited to take part in the negotiation process, through a public call launched through the website of the Office for Cooperation with Civil Society and the Ministry of Justice. Immediately upon receipt of the official version of the screening report, the Ministry of Justice published it at the website, along with the translation into Serbian language.

In accordance with the recommendations of TAIEX experts and the Guidelines for the inclusion of civil society organizations in the process of adopting regulations, adopted by the Government of the Republic of Serbia, civil society organizations were invited once again, using the aforementioned methodology, to give their suggestions on the content of the Action Plan, and subsequently a significant portion of their suggestions was adopted and implemented in the form of activities. The first draft of the Action Plan was published on the website of the Ministry of Justice in Serbian and English language. With the support of GIZ, a round table for 150 representatives of civil society organizations was organized, focusing on the discussion on the role of civil society in the design of reform steps in the negotiation process. Simultaneously, the third call to civil society organizations to provide comments on the first draft of the Action Plan was published. The comments have been included in the content of the activities, whereas the negotiating group prepared and published the Report on the involvement of civil society organizations in the process of negotiations for Chapter 23 on the website of the Ministry of Justice and the Office for Cooperation with Civil Society, indicating the extent and manner of adopting the suggestions of civil society, as well as the whole course and modalities of the consultation process. The same mechanism has been repeated in the process of finalization of the third Action plan draft, parallel with direct consultative process of meetings with representatives of civil society organizations.

The Action Plan shall be under the scrutiny of the Parliament, due to its key role in adoption procedure of the strategic documents. The parliamentary control shall entail two levels: first, consultations with members of parliamentary Committee for European integration in the phase of developing the text of the Action plan and second, the adoption process including parliamentary debate on the text of the Action Plan (general and specific parts of the text) with the possibility to intervene in the text with amendments.

This ultimately means that the final Action Plan shall be the result of the highest possible level of consensus of all three branches of power i.e. the executive, the independent regulatory bodies and civil society organizations, within the constitutional and legal competences of these stakeholders.

With regard to the methodology of drafting the text of the Action Plan in certain areas, the approach of plenary and bilateral consultative meetings, as well as daily online consultations led by coordinators of the subchapters has been used.

For the field of the judiciary, in the process of developing several drafts of the Action Plan, there were seven plenary and 26 bilateral meetings that included representatives of the High Judicial Council, the State Prosecutors Council, Ministry of Justice, Supreme Court of Cassation, the Republic Public Prosecutor's Office, the Prosecutors' Office for the War Crimes, Judicial Academy and Anti-corruption Agency. Online consultations performed on a daily basis had an important role in the development of the plan, allowing for significant refinement of the activities.

For the field of the fight against corruption more than 20 consultative meetings were held with representatives of numerous institutions in the field of health, education, customs, including the Anti-corruption Agency and Council for fight against corruption.

In the field of fundamental rights, due to the nature of the subchapter encompassing a number of areas, a method of bilateral consultative meetings and online consultations was applied. In the process of developing the first draft of the Action Plan, over 40 bilateral meetings were held as well as daily online consultations. The representatives of the following institutions were actively involved in the process: the Ministry of Justice, Ministry of Labor, Employment, Veterans and Social Affairs, the Ministry of Culture and Information - Department of Information, Ministry of Interior, the Ministry of State Administration and Local Self-Government, Ministry of Education, Science and Technological Development, the Office of Human and Minority rights, the Republic Public Prosecutor's Office, the Supreme Court of Cassation, the Commissariat for Refugees and Migration, the Administration for Enforcement of Criminal Sanctions, the Administration for Cooperation with Churches and Religious Communities, the Team for Social Inclusion and Poverty Reduction, the Ombudsman, the Commissioner for Information of Public Importance and Personal Data Protection, the Provincial Ombudsman and UNICEF.

With regard to the methodological and technical approach to the Action Plan development, efforts were made to define the activities in a manner that provides a clear, chronological overview of the necessary legislative changes, the institutional framework, as well as the need to strengthen administrative capacities, with the highest possible level of accuracy currently available, since the implementation of some of the activities is planned in four or five years. Concurrently, a precise definition of activities whose content is determined by the previous performance of specific analyses or assessments, had to be postponed for a period after such assessments are performed and their results are available as a starting point for the development of further reform steps. Consequently, periodical review and updating of the Action plan may be required.

A significant contribution to the quality of the activities in the sub-chapters Judiciary and Fundamental Rights was provided by the results of the Judicial Functional Review in the Republic of Serbia conducted by the World Bank during 2014. Through intensive and constructive dialogue with the World Bank experts, the recommendations from the Judicial Functional Review have been incorporated into the content of the activities of the Action Plan to the greatest extent, bearing in mind the level of generality of recommendations, as well as the scope of the recommendations and the Screening report. Detailed overview of relation between these two documents is given in Annex II. The rest of recommendations are going to be included, to the most possible extension, in the Action Plan for implementation of the NJRS 2013-2018 through the process of its revision and alignment with AP Ch. 23.

In determining the authorities in charge for implementation of the planned activities, the maximum level of specification was necessary to allow the establishment of an effective system of accountability in the implementation of the Action Plan.

A major challenge was the assessment of sufficiently ambitious yet realistic timetables, taking into account both the logical flow of the reforms that needs to be respected, as well as the institutional, administrative and budgetary burden per each year. It was particularly taken into account that the Action Plan envisages amendments to the Constitution by the end of 2017, which brings the need for harmonization of the entire normative framework with the adopted changes, and therefore the period immediately following potential constitutional changes is maximally unloaded from other activities.

Special attention was given to the determination of the indicators to provide mechanisms to measure the impact of the undertaken activities i.e. enabling insight into the degree of the desired results achievement. It was insisted on the fact that the indicators, particularly those of a quantitative character are set for all the activities (or parts thereof) in which it was possible to do so.

One of the imperatives of the plan development was its financial sustainability. In this regard, particular attention was dedicated to generate only minimum additional budgetary burden and maximally exploit, reorganize and coordinate utilization of available resources. The costs of implementing the planned activities are expressed with great precision, using a uniform methodology developed for the purposes of Chapter 23 and 24, in cooperation with international financial experts. Taking into account that the Action plan is a kind of a “living”, periodically updated document, the methodology is designed to allow for any subsequent updates and changes to the Action Plan to result in a very precise expression of the financial effects, in line with the principles indicated in Annex III.

One of the important factors in establishing relationships between activities, timelines and funding sources, was the dynamics of the planning and implementation of projects financed from IPA funds.

For a more complete picture of the reform roadmap the Action Plan, along with the aforementioned annexes incorporated into the Action Plan, several comprehensive documents are made publicly available through their publication on the webpage of the Ministry of Justice:

- a) Uniform budgeting methodology;
- b) Summary of the costs of the Action Plan's implementation;
- c) Report on CSO involvement in negotiation process for Chapter 23.

3. Mechanisms for implementation of the Action Plan

3.1. Subjects responsible for monitoring the implementation of the Action Plan

The responsibility for monitoring the implementation of the activities envisaged in the Action Plan will be shared and entrusted to the Council for implementation of the Action Plan for Chapter 23 (hereinafter: Council), The Head of the Negotiating team for Negotiations for accession of the Republic of Serbia to European Union, the Negotiating Group for Chapter 23 led by the President/Head of the negotiation group, the Coordination body for the process of accession of the Republic of Serbia to the European Union¹, constituted by the Decision on Establishment of the Coordination Body for the Process of Accession of the Republic of Serbia to the European Union in September 2013 by the Government of the Republic of Serbia, which shall consider the most important issues and guide the operations within the scope of the public administration in the process of accession of the Republic of Serbia to the European Union (hereinafter: Coordination body). Coordination body Council² shall perform the operations regarding current issues within the process of accession of

¹The structure of the Coordination Body shall include: 1) Government President; 2) Government First Vice-President; 3) Government Vice-President and Minister of Labor, Employment, and Social Policy; 4) Government Vice-President and Minister of External and Internal Trade and Telecommunications; 5) Minister in charge of foreign affairs; 6) Minister in charge of the European integrations; 7) Minister in charge of finance; 8) Minister in charge of agriculture, forestry, and water management; 9) Minister in charge of environment. The European Integration Office Director and Head of the Negotiating Team for Accession of the Republic of Serbia to the European Union shall participate in activities of the Coordination Body. The Coordination Body activities shall be managed by the Government President, and he shall be replaced by the Coordination Body member assigned by the Government President. Other Government members, Director of the Republic Secretariat for Legislation and the Government Secretary-General, and the National Bank of Serbia Governor may participate in the Coordination Body activities if the topics within their jurisdiction are discussed.

² The structure of the Coordination Body Council shall include: the member of the Government responsible for European integration, who is also a chairman of the Council of the Coordination body, the Director of the Office for European Integration, Head of the Negotiating Team, the heads of negotiating groups, state secretaries of the ministries whose representatives do not lead the negotiating groups, a representative of the National Bank of Serbia, Deputy Director and Coordinator for EU

the Republic of Serbia to the European Union, in accordance with guidelines given by the Coordination Body. Expert and administrative-technical support to the Coordination Body operation shall be provided by the European Integration Office.

The Government of the Republic of Serbia shall make a decision on the establishment of the Council, as a special working body of the Government for the expert support to the Negotiating Group for Chapter 23, accompanied with the adoption of the Action Plan. The Government of the Republic of Serbia shall appoint the members of the Council³ upon the proposal of the President of the Negotiating Group for Chapter 23, for a five-year term with a possibility of mandate extension in a case of negotiation process prolonged duration. The method of the work of the Council shall be precisely regulated by the Rules of Procedure.

The Council for the implementation of the Action Plan for the negotiations for Chapter 23 shall monitor the implementation of the activities envisaged in the Action Plan on a daily basis, anticipate and instigate early warning mechanism in case of delays and other problems in the implementation of the Action Plan and coordinate the reporting process. The Council shall submit monthly reports on the implementation of the Action Plan to the Head of the Negotiating team for negotiations for accession of the Republic of Serbia to European Union, President of the Negotiating Group on Chapter 23 and the Coordination Body Council. The Council shall pay particularly attention to ensuring that monthly reports encompass conclusions and recommendations from relevant bodies which monitor the implementation of national strategic documents (Commission for the Implementation of the National Judicial Reform Strategy for the period 2013-2018, Coordination body for implementation of the National Anti-Corruption Strategy, as well as numerous bodies that supervise implementation of strategic documents in the field of fundamental rights)⁴. Bearing in mind heterogeneity of matter and the number of monitoring bodies in the area of Fundamental Rights, the special attention will be paid when it comes to the implementation of the activities within that subchapter.

In cooperation with the Office for European Integration, the Council shall submit quarterly reports on the implementation of the Action Plan to the Coordination Body and the Committee for European Integration of the National Assembly, 6 monthly reports will be submitted

funds in the EU Integration Office and the representative of the Republic Secretariat for Legislation. In the event the Government member in charge of European Integration is unavailable, he shall be replaced by the Director of the Office for European Integration and Head of the Negotiating Team for negotiations on accession of the Republic of Serbia to the European Union, depending on the topic discussed. A representative of the Office for Cooperation with Civil Society shall participate in the work of the Council of Coordination Body.

³ President of the Negotiating Group proposes members of the Council from among the ranks of civil servants and consultants who have already been engaged in the activities connected to the process of accession to the EU.

⁴ Council for improvement of the position of Roma and implementation of decade of Roma's inclusion; Council for the Rights of the Child; Council for monitoring and improvement of work of criminal proceedings and of enforcement of criminal sanctions towards minors; Coordination body for gender equality; Action team for the development and implementation of the Strategy for fight against violence and inappropriate behavior on sport events; Council for monitoring over the implementation of recommendations of UN mechanisms for human rights; Council for monitoring of implementation of the Action Plan for the implementation of the Strategy of prevention and protection against discrimination; Council for national minorities; Council for Persons with Disabilities.

to the European Commission, as well as an annual report examined and approved by the National Assembly. Quarterly and annual reports shall be published on the web page of the Ministry of Justice and on the web portal dedicated to negotiations with EU.

In cooperation with the European Integration Office, the Council shall ensure the coordination of the reporting process, attempting to avoid overlaps or gaps due to the parallel monitoring of the same or related activities foreseen in the Action Plan and national strategies and action plans in specific areas, for the purpose of the rational use of resources. Within this activity, the Council shall establish ongoing communication with the bodies responsible for monitoring the implementation of national strategic documents.

In order to fully rationalize and coordinate the process of reporting on various strategic documents, Council shall develop a joint calendar for reporting, in cooperation with the Secretary of the Negotiating Group, European Integration Office and aforementioned bodies which monitor implementation of national strategic documents, considering other reporting requirements from the EU.

Expert support provided by the Council to the Negotiating Group for Chapter 23, includes:

1. Adoption of reports on the implementation of the Action Plan;
2. Submission of an initiative for the update of the Action Plan to the President of the Negotiation group for Chapter 23;
3. Coordination with representatives of other bodies responsible for the implementation of relevant strategies and action plans;
4. Analysis of collected and compiled statistical data necessary for making strategic decisions, as well as other data determined as indicators for the implementation of the Action Plan;
5. Initiates collection, compilation, processing and analysis of data from all bodies determined as responsible authorities for specific activities set in the Action Plan, for the purpose of preparing reports on implementation of the Action plan;

Given the fact that the Council is a temporary working body of the Government, whose members do not receive any compensation for their work, and that it doesn't have the necessary administrative and technical capacities, the Ministry of Justice, as a coordinator of the Negotiation group for Chapter 23, shall provide the necessary administrative and technical support to the Council.

Aimed at achieving the best possible results in the implementation of the Action Plan, above described mechanism is going to be subject of annual assessment and reconsideration.

3.2. Role of civil society in implementation of the Action plan

Taking into account that mechanisms of cooperation with civil society, established during the screening process and the process of drafting the Action plan, have given excellent results, the Negotiating Group for Chapter 23 shall continue to use them during the process of implementation of the Action plan. This mechanism will be implemented through an announcement of a public call, in cooperation with Office for cooperation with civil society, for submission of proposals and comments in connection to implementation of the activities envisaged in the Action plan. Reports shall be made on the received comments and proposals which shall be published on the web page of the Ministry of Justice and the web portal dedicated to negotiations with the EU. Those reports shall also be enclosed to periodical reports on implementation of the Action plan, submitted to the bodies in charge of monitoring the implementation, and subsequently shall be taken into consideration and implemented in the process of updating the Action plan.

In addition, the Negotiating Group for Chapter 23 shall organize bi-annual meetings with the National Convent for accession to EU in order to review current problems and methods to improve the implementation of the Action plan activities.

3.3. Early warning mechanism in case of delays in implementation of the Action Plan

In the case of perceived delays, setbacks or other problems in the implementation of the Action Plan, in addition to the regular reports, the Council may issue a warning which is also delivered to the Head of the Negotiating Team for Accession of the Republic of Serbia to the European Union, President of the Negotiating Group on Chapter 23 and the Coordination Body Council. Depending on the nature of the problems and the responsibilities for their elimination, these bodies shall undertake further measures towards the responsible authorities with a view to remedy the problems in the implementation. In the event that delays or problems in the implementation of activities persist, the Head of the Negotiating Team for Accession of the Republic of Serbia to the European Union, the President of the Negotiating Group and the Coordination body Council shall so inform the Coordination Body and the Committee for European Integration of the National Assembly, which shall, within its jurisdiction, take further measures towards the subjects foreseen in the Action Plan as responsible authorities for undertaking activities whose implementation is delayed or there are other problems in their implementation. However, in case that despite all the aforementioned measures, the entities that are responsible for the implementation of certain activities of the Action Plan, do not act in line with the Action plan, Coordination Body and the National Assembly are entitled to initiate proceedings to determine liability of those entities, in accordance with applicable regulations governing the operation of the aforementioned entities.

The institutional framework encompass: Constitutional Court, the High Judicial Council, the State Prosecutorial Council, Ministry of Justice, Judicial Academy, Supreme Court of Cassation, four appellate courts, 25 higher courts, 66 basic courts with 25 court units, Misdemeanor court of appeal with three departments, 44 misdemeanor courts, Commercial Court of Appeal, 16 commercial courts, Administrative Court with three departments, the Republic Public Prosecutor's Office, four appellate public prosecutors' offices, 25 higher public prosecutors' offices, 58 basic public prosecutors' offices.

The judicial system in the Republic of Serbia, as of September 1st 2014, encompasses 2800 judges, 90 public prosecutors and 741 deputy public prosecutors

National Assembly of the Republic of Serbia enacted the National Judicial Reform Strategy for the period 2013-2018 on July 1st 2013, which has determined priorities, strategic goals and strategic guidelines of reform measures. The Government of the Republic of Serbia adopted an Action plan for implementation of the National Judicial Reform Strategy for the period 2013-2018 on July 31st which envisages concrete measures and activities for implementation of strategic objectives, defines the deadlines and competent authorities for its implementation and financial sources. National Judicial Reform Strategy for the period 2013-2018 envisages mechanism to monitor the implementation of reform measures, in the form of Commission for Implementation of the National Judicial Reform Strategy for the period 2013-2018, with the composition of 15 members who are representatives of all relevant stakeholders in the reform process.

The Strategy envisages independence, impartiality, competence, accountability and efficiency of the judiciary, as five basic principles and defined priorities, strategic objectives and strategic guidelines of reform measures.

Concerning independence of judiciary, the National Judicial Reform Strategy for the period 2013-2018 has identified the need of amending the Constitution in the part which deals with the interference of legislative and executive powers in the process of appointment and dismissal of judges, court presidents, public prosecutors and deputy public prosecutors, elected members of the High Judicial Council and State Prosecutorial Council, and the need for précisising the role and status of Judicial Academy, as mechanism for entry to judiciary. In addition, due to length and complexity of amending the Constitution, a series of interim measures are provided aimed at strengthening the independence of the judiciary through amendments to the judicial laws within the provisions of the Constitution of the Republic of Serbia. The High Judicial Council and State Prosecutorial Council, in accordance with the strategic objectives, should become the key institutions of the judiciary with full capacities of their competencies and with precisely defined system of transparency and accountability.

In the first year of implementation of the National Judicial Reform Strategy for the period 2013-2018 set of judicial laws has been amended and judicial independence has been strengthened with these interim measures, within the framework of the current Constitution. At the same time, work has commenced, on an analysis of the provisions of the Constitution of the Republic of Serbia and on the identification of necessary amendments in the part relating to the judiciary. Presidents of the courts of all levels have been appointed. The High Judicial Council and State Prosecutorial Council adopted criteria and standards for the performance appraisal of judges, presidents of courts, public prosecutors and deputy public prosecutors and the Councils have commenced preparing the criteria and standards for appointment to judicial offices. Planned amendments to the Law on the High Judicial Council and State Prosecutorial Council will significantly improve transparency in the work of the Councils. Introduction of program budgets has commenced and capacities of the administrative offices of the High Judicial Council and State Prosecutorial Council have been strengthened. Taking into account the constantly extending scope of competences of the Councils, it is still evident the need for strengthening the capacities in the fields of finance, analytics and strategic planning.

The National Judicial Reform Strategy for the period 2013-2018 stipulates implementation of measures aimed at improvement of impartiality, ethics and integrity of the judicial office holders as well as at the alignment and complete accessibility to the case law and the full realization of the right to the natural judge. In this regard, the State Prosecutorial Council has established a Board of Ethics, and the same activity is underway in the High Judicial Council.

The same strategic document also stipulates the establishment of a system of appointment and promotion of judges and public prosecutors according to clear, objective and criteria determined in advance. Following measures in the reform of Judicial Academy are set forth as the strategic approach: Improving initial and continuously training of judges' and public prosecutors' associates and assistants, and judicial office holders as well as of representatives of legal professions, along with the system of development of a comprehensive annual training programs and assessment of attendees.

Improvement of operation of disciplinary bodies of the High Judicial Council and State Prosecutorial Council is set forth in the National Judicial Reform Strategy for the period 2013-2018. Despite commencement of operation of those disciplinary bodies, their work has to be much more efficient.

Taking into account the fact that inefficiency has been the greatest long-standing problem of the Republic of Serbia judiciary, the National Judicial Reform Strategy for the period 2013- 2018 has envisaged a series of measures aimed at improving efficiency, commencing from improving of procedural laws, establishing an e-justice system, as well as the monitoring and correction of the functioning of the judicial network. Alleviation of the workload of courts is also envisioned through the introduction of a system of enforcement agents, notaries and mediation in disputes resolution, which would, along with the swift resolution of case backlog and infrastructure investments achieve shorter duration of court proceedings and improve access to justice.

From January 1st 2014 a new judicial network has entered into force with an increased number of courts and public prosecutors' offices, which should reduce expenses and contribute to easier access to justice. There have been considerable investments in infrastructure that already, by the end of 2014, supposed to lead to a significant increase in the number of courtrooms, especially in Belgrade, where this problem has existed for decades. Improvement of Information and Communication Technology in courts and public prosecutors' offices has continued, however there is still a problem with the parallel operation of multiple incompatible systems, making it difficult to monitor the statistical parameters of judicial efficiency, the exchange of information between courts and public prosecutors' offices, parties' insight into the status of the case, as well as the duration of proceedings. This status of Information and Communication Technology has a negative impact also on the reach of the automatic case management, which improvements also caused by the need for the introduction of a case weighting system. The Supreme Court of Cassation has adopted a Uniform backlog-reduction program in the Republic of Serbia in December 2013 that stipulates gradual reduction of backlog of cases with 80% by 2018. Furthermore, significant steps have been made towards the relief of courts by using the system of bailiff/enforcement officers. From September 1st 2014 public notaries have commenced working, and from January 1st 2015, upon the enactment of the Law on mediation, legislative framework for the operation of the system of mediation has been created.

From October 1st 2013 the implementation of the Criminal Procedure Code from 2011 has commenced in all courts and public prosecutors' offices of general jurisdiction, which has introduced prosecutorial investigation as the most important novelty. Despite initial obstacles in implementation, there has been a significant increase in the percentage of proceedings completed by applying the principle of opportunity in criminal prosecution and plea bargain.

Considering that National Judicial Reform Strategy for the period 2013-2018 (priorities and defined goals in the Strategy correspond to recommendations from screening report) has been developed as a result of general consent of all relevant subjects in the field of judiciary, during the process of drawing up the Strategy particular attention was given to take into account crucial activities envisaged in the Action plan for the implementation of the National Judicial Reform Strategy for the period 2013-2018. In this way, higher degree of coherence between these two documents is achieved and supervision over reform implementation is facilitated. In addition, activities envisages in the Action plan for negotiations represent "map" of the reforms, whereas Action plan for the implementation of the National Judicial Reform Strategy for the period 2013-2018 includes broader scope of detail activities, and will be amended so as to include to the maximum extent the recommendations from the Functional Review. In order to achieve complete cohesion of two documents (particularly concerning deadlines), revision of Action plan for

the implementation of the National Judicial Reform Strategy for the period 2013-2018 will be conducted after adoption of Action plan for negotiations. A functional analysis of judiciary in the Republic of Serbia was conducted with the support of the World Bank, with the aim of objective consideration of overall current state of play, as of July 1st 2014, in the judiciary in the Republic of Serbia, as well as concerning the degree of implementation of the measures provided in the Action Plan for implementation of the National Judicial Reform Strategy for the period 2013-2018. Conclusions and guidelines from the Draft of this document were used as a starting point for defining further reform activities, all in the context of recommendations encompassed in Report from screening.

WAR CRIMES

The legal framework in Serbia encompass: Law on Organization and Jurisdiction of Government Authorities in War Crimes Proceedings (RS Official Gazette, Nos. 67/03, 135/04, 61/05, 101/07, 104/09, 101/11 oth.law and 6/15.) establishing the institutional framework for the prosecution of war crimes. In addition to the mentioned law, the currently applicable normative framework in the area of prosecution and punishment of those accused of war crimes in the Republic of Serbia includes: the Criminal Code (RS Official Gazette, No. 85/05, 88/05- corr, 107/05- corr., 72/09, 111/09, 121/ 12,104 /13 and 108/14); the Criminal Procedure Code (RS Official Gazette, Nos. 72/11, 101/11, 121/12, 32/13, 45/13 and 55/14); the Law on Mutual Assistance in Criminal Matters (RS Official Gazette, No. 20/09); the Law on the Protection Programme for Participants in Criminal Proceedings (RS Official Gazette, No. 85/05); the Law on Cooperation with the International Criminal Tribunal for the Former Yugoslavia (FRY Official Gazette, No. 18/02 and SaM Official Gazette, 16/03); Law on Migration Management (RS Official Gazette, no. 107/2012); Decision on the establishment of the Commission for Missing Persons of the Government of the Republic of Serbia on 8 June 2006 (RS Official Gazette, Nos. 49/06, 73/06, 116/06, 53/10 and 108/12); Memoranda of Understanding concluded between the competent authorities of the Republic of Serbia and the competent authorities of the countries in the region (Croatia, Bosnia and Herzegovina, Montenegro) and the Protocol on Cooperation with EULEX, which are aimed at establishing direct cooperation and more efficient exchange of information on war crimes and their perpetrators. Jurisdiction for War Crimes in Serbia: 1) Criminal offences from art. 370 through 386 of the Criminal Code; 2) Serious violations of International Humanitarian Law committed in the territory of the former Yugoslavia since January 1st 1991 stipulated in the Statute of the International Criminal Tribunal for the Former Yugoslavia; 3) Criminal offence from Art. 333 of the Criminal Code - assistance to the perpetrator after the commission of crime, if committed in relation to criminal offences from point 1) and 2) of this Article.

Institutional framework: 1) Ministry of the Interior, War Crimes Investigation Service: Head of Service, Deputy Head, two department heads, four section chiefs, 43 members of the Service; 2) Ministry of the Interior, the Protection Unit; the Section for Assistance and Support to Victims and Witnesses: the number of employees - three 3) Office of the War Crimes Prosecutor: the Prosecutor, six Deputy Prosecutors, two Advisors, three Assistants; 4) Higher Court in Belgrade, War Crimes Department: six judges, one preliminary proceedings judge; 5) Court of Appeal in Belgrade, War Crimes Department; 6) Service for Assistance and Support to Victims and Witnesses: the number of employees - three. 7) Commissariat for Refugees and Migration, the Sector for Reception, Accommodation and Sheltering, Readmission and Durable Solutions, Department for Missing Persons (as administrative and technical support to the Commission for Missing Persons): the number of employees - three. It was recognized on the international level that the judicial and prosecutorial resources need to be adequate. This especially, in the light of the number of evidence/cases that are being transferred from the ICTY and regional cooperation. War Crimes Prosecutor's Office has received, in the recent months, tens of thousands documents, as well as a large number of photo albums and documents from the Prosecutor's Office of ICTY. In order to address the aforementioned increased inflow of evidence and the workload, War Crimes Prosecutor's Office should at least build their capacities which are provided in the current systematization. Upon the completion of mandate of Tribunal in the Hague, the responsibility for the prosecution of war crimes is fully transferred to the Republic of Serbia, which must demonstrate that its institutions are dedicated and administratively able to responsibly process all remaining war crimes suspects and to contribute to the process of transitional justice.

During the cooperation with the ICTY, Serbia handed over 46 suspects to International Criminal Tribunal for the former Yugoslavia (ICTY). Serbia has daily cooperation with the ICTY prosecutor's office. It should be noted that the Residual Mechanism of the ICTY (pursuant to the Completion Strategy of the ICTY) started functioning on July 1st 2013 and that certain problems arose with transferring evidence from the ICTY to the War Crime Prosecutor's Office. Namely, redacted witness statements given to investigators of the ICTY are transferred but disclosure of

witness identity to the Serbian War Crime Prosecutor's Office is lacking. Currently, the War Crime Prosecutor's Office receives scarce number of statements on a case by case basis but still without the ones that could identify the perpetrators. Statements by those witnesses would open several war crime cases against several members of paramilitary formations and high officials and solution of this problem will be the main incentive for cases against high level perpetrators.

Statistics of war crime proceedings have changed since the Screening report for Ch.23. Through domestic trials, at the moment 435 persons were processed, currently there is 14 ongoing cases in 1st instance (against 40 defendants) in comparison to 10 cases against 34 defendants in the screening report. As regards regional cooperation, Serbia at this moment has 264 exchanges of information and evidence related to 131 cases with Croatia, 42 with Bosnia and Herzegovina, 9 with Montenegro and 83 with EULEX and the United Nations Interim Administration Mission in Kosovo (UNMIK).

The new Criminal Procedure Code (CPC) was introduced in War Crime proceedings since January 15th 2012 and has enabled prosecution control/administration over the investigative phase of the proceedings and has introduced new relations with State authorities and their duties in criminal proceedings. According to new CPC the prosecutor office is leading the pre-investigation proceedings (not investigative judge) and conducting investigation (possibility to conduct investigation against unknown person). Prosecutor's office has jurisdiction to instruct the police to conduct certain measures while police has obligation to act and to inform prosecutor's office upon their requests. New CPC has given wider jurisdiction for prosecution in collecting evidence during the investigation and elevated responsibility for the legality in obtaining of evidence. It has been widely agreed by the international observes and organizations that the courts processes cases more efficiently and the judges perform better under new procedural rules.

REFORM ACTIVITIES COMPLETED DURING THE PROCESS OF DRAFTING OF THE ACTION PLAN (SEPTEMBER 1st 2014- JUNE 15th 2015)

INDEPENDENCE

Analysis of the provisions of the Constitution of the Republic of Serbia in relation to the questions of principles (the first phase of the analysis) is completed. By the end of the (2015) year it is expected to be the full completion with concrete proposals regarding the amendment on the concrete articles.

The National Assembly appointed the remaining court presidents at the proposal of the High Judicial Council. It remains to finalize the election of a president in six courts, out of the total of 91 basic and higher courts. The appointment procedure for the rest positions is currently ongoing. Number of vacancies on Jun 15th 2015 is: 306 for judges, 52 for public prosecutors and 78 for deputy public prosecutors.

High Judicial Council has introduced program budget in accordance with the Law on the Budgetary System of the Republic of Serbia that prescribes that transfer to program budget will start from 2015. Program budget establishes system that displays clear connection between: policies of government e.g. programs implemented by the government, objectives and results of those programs, on one hand, and means necessary for their fulfillment, on the other hand. Costs of functioning of budgetary beneficiaries are displayed through concrete programs and activities. Introduction of program budget have changed methodology of budgetary planning and reporting on implementation of budget whereas it did not influence independence of High Judicial Council in regards to management of courts' budgets.

High Judicial Council adopted a training plan for all employees in the Administrative office in the fourth quarter of 2014. Right now, in progress are planning of the activities aimed at building capacity within the *IPA 2013*, strengthening the strategic and administrative capacities of HJC and SPC and Twinning contract.

The High Judicial Council monitors the results of implementation of judicial laws that are currently on the force as well as future judicial laws that is going to be adopted after constitutional changes. The working group within the State Prosecutorial Council for monitoring the implementation of the judicial laws is operational since January 13th 2014 and prepares quarterly reports on implementation of judicial laws.

The State Prosecutorial Council has adopted the Rules on the criteria and standards for the evaluation of qualification, competence and worthiness of candidates for election process of holders of prosecutorial office (Criteria for election to office) on its' session held on May 14th 2015.

Program budget in the State Prosecutorial Budget was introduced on January 1st 2015. Duties of State Prosecutorial Council are divided in two activities- activities of the Council (professional services of Council's members) and activities of Administrative Office. Those two activities are funded in program budget. Significant strengthening of the capacity of the Administrative office of State Prosecutorial Council in accordance with extended scope of State Prosecutorial Council's competencies was conducted in 2015 with the support of IPA 2013 Twinning project which includes a number of activities aimed at strengthening the capacity of the Administrative office in the field of finance.

IMPARTIALITY AND ACCOUNTABILITY

The Board of Ethics of the State Prosecutorial Council has been established and Draft of its Rules of procedure has been completed. Its adoption is expected to be in near future. Training program for judicial office holders on integrity rules and ethics is developed in IV quarter of 2014

High Judiciary Council adopted on 8 May 2015 Rules on procedure for determining disciplinary responsibility of judges and court presidents by which the existence of a double-track procedure for "ordinary" and "serious" disciplinary offences has been eliminated.

PROFESSIONALISM/COMPETENCE/EFFICIENCY

Functional analysis of Judicial Academy's needs which encompasses data on program duties, organizational, financial and spacious needs and determining funds in accordance with the results of the analysis was conducted in the end of 2014 and recommendations published in February 2015.

The new, improved Annual curriculum of training that covers all areas of law (including EU law and human rights) has been adopted by HJC on April 21st 2015 and SPC on May 15th 2015 and its is being successfully implemented.

Activity regarding the development of monitoring system concerning quality of initial, continuous and specialized training that implies bidirectional evaluation system that would allow the assessment of the results of training or degree of advancement of knowledge of the participants, as well as the assessment of the quality of the program and trainers has being successfully implemented. Cooperation with the Institute for quality assurance of education only asserted our belief that it is necessary to well determine strategic planning. Both initial and continuous educations are conducted at the Judicial Academy since its establishment. At initial education, candidates are evaluated by mentors and at the end of education they are passing the final exam, simulation of trial, evaluated by the commission. Continuous education is being evaluated through standard questionnaires, evaluating the following aspects, quality of lecturers and conditions of work. Implementation of the activities was initiated by the establishment of the Program group for improving the evaluation of training within the Judicial Group, consists of two judges of SCC, two judges from Court of Appeal, one judge from Higher Court, one deputy public prosecutor from Republic Public Prosecutor's Office and two university professors specialize for pedagogy and andragogy. This group will be administered by the Head of Department for monitoring and evaluation of the Judicial Academy. This group will work on enhancement of

continuous and initial training, enhancement of mentor and lecturer work, as well as on enhancement of educational programs. System of progress monitoring after seminars, at the level of knowledge of judges and prosecutors shall be introduced, through testing. Monitoring and evaluation enhancement shall be achieved through introduction of e-learning system, enabling more precise and complex measurement of different aspects of education process.

Adequate building for permanent accommodation of the Judicial Academy was obtained on 9th April 2015 by Serbian Government decision and a preliminary design of the reconstruction of the building and bill of quantities are prepared.

Implementation of the Uniform Backlog Reduction Program

Although the envisaged goal of 20% backlog reduction which was prescribed in Uniform BRL Program has not been achieved during 2014, it is necessary to point out that new courts network has been established as of January 1st 2014, and this slowed down the work of courts during January and February of 2014. It was necessary to establish newly-formed courts and transfer respective cases to them. Furthermore, following the decision of the Bar Chamber of Serbia, attorneys did not participate in court trials for at least four months (September – December 2014, and several days during June 2014).

Those were objective circumstances that prevented courts from working in full capacity. These arguments are confirmed by the fact that appellate courts reduced number of old cases by 25%, the Administrative Court by 52.38%, the Commercial Appellate Court by 78.75% (cases pending for more than 10 years from filing an initial act) and by 81.77% (cases pending for more than five years from filing an initial act) while there are no cases older than two years. Furthermore, the Misdemeanor Appellate Court received 2,198 old cases - which resulted from changed jurisdiction that became effective on March 1st 2014, and closed 93% of those cases. Listed courts suffered the least impact from attorneys' non-participation in trials. The presented trend was the very intention of the National BLR Program, and it was not reached because of the mentioned objective reasons, hence prescribed goals were not met in basic and higher courts since their work is "linked" to the attorneys' participation in trials to a highest degree. In spite of that, it is worth noting that percentage of cases solved on merits in higher courts is high – 75.60%, which represents 1.40% increase compared to 2013 which leads to the conclusion that courts worked on solving "old cases". In basic courts, number of unsolved cases is reduced by 3.06% compared to 2013, and such trend of reduction of unsolved cases is present also in the courts of special jurisdiction which is obvious from already presented statistical data.

Teams in charge of reduction of backlogged cases were established in all courts. All the courts in Republic of Serbia adopted backlog reduction programs by which they envisaged forming of the backlog reduction teams. These teams are specialized for analyzing causes of long trial durations and finding adequate solutions for tackling all the identified issues. This practice has yielded very good results in 10 pilot courts that cooperated with USAID Separation of Powers Program. Based on courts' reports, these teams are currently working in all the courts and actively contribute to solving systematic, as well as concrete problems relating to courts' efficiency and backlog reduction.

Numerous memoranda of cooperation were signed between the presidents of courts of all levels and authorized representatives of the relevant departments and institutions during 2014. This should contribute to better inter-institutional communication and more effective coordination of activities between various institutions that participate or contribute to court proceedings in some way, such as for example better service of process through police and post office. The memoranda prescribe numerous commitments for the parties with the aim to increase court efficiency. This practice has yielded very good results in 10 pilot courts that cooperated with USAID Separation of Powers Program.

To prevent future blockade of the judiciary the further aligning of the normative framework of the Republic of Serbia, which governs the area of advocacy with the EU *acquis*, in particular with General Services Directive - Directive 2006/123 / EC of the European Parliament and the Council of 12 December 2006 on services in the internal market; Council Directive 77/249/EEC of 22 March 1977 to facilitate the effective exercise by lawyers of freedom to provide services; Directive 98/5/EC of the European Parliament and of the Council of 16 February 1998 to facilitate practice of the profession of lawyer on a permanent basis in a Member State other than that in which the qualification was obtained; Directive 2005/36 / EC of the European Parliament and the Council of 7 September 2005 on the recognition of professional qualifications; Recommendation of the European Commission Rec (2013) 8179/2 on the right to legal aid to defendants in criminal proceedings, which would, inter alia, prevent future blockade of the judiciary, is needed.

The intensive reform activities related to **judicial professions systems** have been conducted during the period of drafting the Action Plan.

Pursuant to the Law on the Notariat, the first 93 notaries were introduced into the Serbian legal system as of 1 September 2014, for the territory of 32 basic courts. The Founding Assembly of the Notary Chamber of Serbia was held on 15 August 2014, on which occasion the Chamber enacted legislation necessary for the start of the profession. The Chamber and the Ministry of Justice have subsequently enacted other necessary acts, which are unaffected by the amendments to the laws from 21 January 2015. The establishment of a high quality, efficient notary system which will be able to prevent and reduce the excessive workload in the courts through preventive justice and taking over of further competences requires a well-functioning professional body which will monitor and control the work of its members, set professional standards and discipline when necessary, for which reason further work on these acts is necessary.

Based on an analysis of the application of the law, on 5 November 2014 (*“Official Gazette of RS”, no. 121/2014*) amendments and supplements to the Law on the Notariat and Law on Real Estate Conveyance have been enacted, which ended the two-month long exclusivity of notaries to conclude contracts on the transfer of real estate through a notary record. Likewise, certain provisions of the Notarial Tariff were amended and certain fees reduced (*“Official Gazette of RS”, no. 103/2014 and 138/2014*). Through a further analysis of implementation of the laws, and upon conducted negotiations with the Bar Association of Serbia, an agreement was signed, based on which amendments to the Law on the Notariat, the Law on Real Estate Conveyance, the Law of Succession, Family Law and the Law on Non-Contentious Proceedings were adopted on 21 January 2015 (*“Official Gazette of RS”, No. 6/2015*), reducing the number of legal matters which must be concluded in the form of notary record while increasing cases of solemnisation, introducing more detailed procedures for solemnization as well as judicial protection in the cases in which a notary issues a decision on the refusal of performing notarial acts.

The Rulebook on the Number of Notaries’ Positions and the Official Seats of Notaries and the 100 Notaries’ Positions for which a Public Call will be Announced (*“Official Gazette of the RS”, No. 31/12 and 57/14*), provides for 371 notary positions to be established. On 15 June 2015, there are 132 notaries working in Serbia while notaries have not yet been appointed for the territory of 14 basic courts (two public calls have been announced by the Notary Chamber of Serbia: the first was completed on 16 March 2015, when 49 notaries have been appointed; the second was announced on 24 April 2015 for 27 new notarial positions and is currently being conducted).

Ad hoc seminars and workshops in cooperation with GIZ Program for Legal and Judicial Reform and the Foundation for Continental Law have continuously been implemented. To ensure the sustainability of training of notaries, a working group comprising of the Ministry of Justice, the Judicial Academy and Chamber of Notaries was established to develop the programs of initial and continuous training and a Professional Council has been established on 9 February 2015, consisting of professionals from jurisprudence and judiciary with the aim of harmonising practice and a tendency to be transformed into a Notary Academy. In the intermediary period, a Memorandum on Cooperation with the Judicial Academy has been signed in order to provide training. Moreover, a Memorandum on Cooperation with the High Notarial Council of France was concluded on 7 November 2014 while GIZ has adopted a Plan of Support for 2015 aimed at providing continuous trainings for notaries during 2015.

The Ministry of Justice has issued in III quarter of 2014 a new Bylaw on internal organization and jobs which envisages an increase in the number of persons employed in the Department of Judicial Professions from one to three who deal with the notary system to three jobs systematized for this task. These employees have participated in relevant training workshops for notaries and in study visits.

For the purpose of promotion of the notary system, various activities were conducted, including broadcasting of a promo spot and jingle in September 2014 on television and radio and distributing of brochures on activities of notaries along with the daily press, with the support of GIZ Program for Legal and Judicial Reform. All relevant information and infographics are also

published on the websites of the Ministry of Justice and Chamber of Notaries, while representatives of the Ministry of Justice and Chamber of Notaries continue to appear in numerous news programs. Further promotional activities need to be conducted in order to familiarise citizens and other legal professionals with the benefits of the notary system.

The Law on Mediation in Dispute Resolution has become applicable on 1 January 2015 and the Ministry of Justice has passed all by-laws necessary for the implementation of the law in the period from December 2014 to April 2015. A novelty of the Law on Mediation in Dispute Resolution is licensing of mediators and keeping a register of mediators as a public central electronic database. On 6 February 2015 the Ministry of Justice announced a public call for granting licenses for mediation and has published the register on its website on 15 May 2015. Concluding with 15 June 2015, 114 mediators have been appointed and registered. The law also envisages establishing an effective system of training for mediators. Two organizations have been granted status of accredited institutions responsible for the implementation of basic training. One of these organisations has also submitted programs for four types of specialized trainings for which it has received approval. All relevant information on the establishment of the system of mediation is published on the website of the Ministry.

For the purpose of improvement of efficiency of the enforcement system, the Ministry of Justice's Law on Enforcement and Security Working Group has continued to work on the text of the draft law, supported by the Rule of Law and Enforcement Project (*RoLE; IPA 2013/324-223*), with the delivery of its Report and Overall Assessment of the Enforcement Regime of Civil Claims, as well as with expert advice. The analysis itself has shown a need for a comprehensive reform of the procedural law, taking into account the national legal and institutional framework, the EU *acquis*, international standards and best practice. On 18 December 2014, in order to improve the efficiency of the procedure and considering the findings and recommendations contained in the Assessment Report, amendments to the Law were enacted which provided for jurisdiction of the enforcement agents according to residence or seat of the enforcements debtor as well as relating to the need for a more uniform distribution of utility and similar cases to enforcement agents, through the Chamber of Enforcement Agents (*"Official Gazette of RS", no. 139 from 18 December 2014*). Further, a Memorandum on Cooperation was signed between the Judicial Academy and the Chamber of Enforcement Agents for the purpose of training of enforcement agents at the First Annual Consultations of Enforcement Agents held on 22-22 March 2015.

When it comes to the measures undertaken to **improve e-justice system**, the comprehensive analysis of hardware and software supported by USAID and the Ministry of Justice is completed as of February 2015, and by the end of 2015 it is planned to implement a detailed analysis of the technical and human resources as well as the quality of data in the system, conducted by the Ministry of justice- ICT Sector.

Regarding the **improvement of court practice uniformity**, the first phase of the Analysis of the normative framework which regulates: the issue of binding of jurisprudence, right to legal remedy and jurisdiction for deciding on legal remedy; publishing judicial decisions and judicial reasoning taking into account the views of the Venice Commission is completed. The second phase of the analysis of the constitutional provisions is in progress, and subsequently, with the support of experts, consideration of potential changes of the constitutional and legal framework will be possible.

Regarding the improving access to regulations and case law, through establishment and promotion of comprehensive and widely available electronic databases of legislation and case law the Official Gazette, in accordance with the Law, as of January 1, 2014, that is as of the establishment of a Legal-information system of the Republic of Serbia, has made available the following, free of charge to all Internet users: unofficial consolidated versions of existing regulations at the national level, the original official publications in PDF format which involve the basic texts of regulations and official gazettes in which their amendments are published. Hence in this way it enabled free access to the complete basis of all daily updated and consolidated regulations at the republic level. In addition, as of January 1, 2014, the Official Gazette made case law database available free of charge (in order to fulfill this obligation 496 free access codes were open with over 4,800 access session).

The Supreme Court of Cassation is continually working to complement the database of the court decisions. Regarding capacity strengthening and improvement of efficiency of operation of departments for jurisprudence in Supreme Court of Cassation some steps were undertaken and activity is being successfully implemented. In mid-2014, capacities were strengthened by the engagement of one judge and an advisor in the field of practice and protection of the right to trial within a reasonable time. Since March 2015 a consultant in the field of jurisprudence is engaged.

Beside earlier mentioned activities, at this moment, the Supreme Court of Cassation carries out the numerous following activities aimed at unification of court practice:

- Supervises implementation of the Joint Activity Plan of Appellate Courts on Organization, Timing and Venue of appellate courts' joint sessions: it takes part in the meetings, it collects and systematizes disputed legal issues, legal standpoints and conclusions of appellate courts; discusses them in its departments' sessions; publishes them on its website.
- Harmonizes case-law in the area of protection of the right to a trial within reasonable time; organizes meetings and conferences of educational nature, in order to secure unified application of the Law on Courts' Organization, European Convention on Human Rights, and the case-law of European Court for Human Rights; it regularly publishes legal sentences from this area of law and distributes them to all judges who deal with this type of cases.
- Harmonizes case-law in the area of enforcement: by answering disputed legal questions; initiating different forums for experience exchange and exchange of disputed issues between basic and commercial courts, as well as between the courts and enforcement agents.
- Organizes training for legal advisors and assistants of state-level and appellate courts which are related to organization of case-law departments in these courts, nomenclature of decisions, techniques of decision registering, and operations of these departments.

In line with the recommendation of the National Judicial Reform Strategy Implementation Commission 2013-2018 the task of the Commission for monitoring the implementation of Criminal Procedure Code has been renewed and it assumes the role of a unified multi-institutional mechanism for supervision over the implementation of the Criminal Procedure Code.

INCLUSION OF THE PROFESSIONAL ORGANIZATIONS AND CSOs IN THE PROCESS OF PLANNING AND MONITORING OF THE REFORM ACTIVITIES

The significant progress in the field of the inclusion of the CSOs in process of planning a reform activities during the drafting of the Action Plan Ch. 23. Ministry of Justice and the Office for Cooperation with civil society has organized several cycles of public calls for submitting suggestions and comments within a period IIIQ of 2014 to IIQ of 2015 during which civil society organizations have submitted their proposals regarding the development of the reform steps in the Action Plan for Ch. 23. The report has been made on the extent of implementation of each of the received comments and published at the website of the Ministry. Beside of that the representatives of the Negotiating Group for Chapter 23 regularly meet with representatives of the National Convent, as well as individual organizations, with the aim of collecting as precise information as possible and planning joint projects. More privileged status have professional organisations (Association of judges, Association of Misdemeanour judges and Association of Public Prosecutors and Deputy Public Prosecutors) that, beside written comments and meetings with representatives of the Negotiation Group for Ch. 23 have full-fledged permanent representatives in the Judicial Reform Strategy Commission as the highest monitoring body in the field of judiciary, since its has been established in 2013.

WAR CRIMES

The working group for drafting the National Strategy for the investigation and prosecution of war crimes, consists of representatives of Higher and Appellate Court, WCP, WPU, WCIS, Ministry of Justice, professional organizations, Bar Association and academic community is established on March 23rd 2015. And held several meetings. Regarding the development of the Draft Prosecutorial Strategy for investigation and prosecution of war crimes in Serbia in the light of the Completion Strategy of the ICTY and Draft National Strategy for investigation and prosecution of war crimes, with the involvement and support of the ICTY, MICT, ICC, Regional prosecutors and NGOs, WCP prepared first Draft of Prosecutorial Strategy for investigation and prosecution of war crimes in Serbia and delivered it to the Working group for drafting the National Strategy for the investigation and prosecution of war crimes, with idea of achieving alignment with Draft National Strategy for investigation and prosecution of war crimes as soon as it is prepared.

1.1. INDEPENDENCE

RECOMMENDATION FROM THE SCREENING REPORT	OVERALL RESULT	IMPACT INDICATOR
<p>1.1.1. With the support of external experts, Serbia should make a thorough analysis of the existing solutions/possible amendments to the Constitution bearing in mind the Venice Commission recommendations and European standards, ensuring independence and accountability of the judiciary. Changes should include, inter alia, the following points:</p> <ul style="list-style-type: none"> The system for the recruitment, selection, appointment, transfer and termination of judge's office, presidents of Courts, and prosecutors should be independent of political influence and remain of the responsibility of the High Judicial and State Prosecutorial Councils. Entry in the judiciary shall be based on merit-based objective criteria, fair in selection procedures, open to all suitably qualified candidates and transparent in terms of public scrutiny. The High Judicial Council and the Prosecutorial Council should be empowered with leadership and the power to manage the judicial system, including when it comes to immunities. They should have a pluralistic composition, without involvement of the National Assembly (unless solely declaratory), with at least 50% of members stemming from the judiciary, representing different levels of jurisdiction. Their elected members should be selected by their peers; Legal or executive authorities should not have the power to supervise or monitor operations of the judiciary; Reconsider the probation period of three years for candidate judges and deputy prosecutors; Clarify the grounds for the dismissal of judges; Clarify the rules for terminating the mandate of Judges of the Constitutional Court; 	<p>Adopted new Constitution and judicial laws aligned with new Constitution which, taking into account the recommendations of the Venice Commission and European standards, ensures the independence of the judiciary from political influence, maximally restricting influence of legislative and executive powers in the process of recruitment, selection, appointment, transfer and termination of the judge's office, presidents of the courts, and (deputy) public prosecutors, which must be based on precise criteria. Constitution and judicial laws guarantees entrance in the judiciary based on merit-based objective criteria, fair in selection procedures, open to all suitably qualified candidates and transparent in terms of public scrutiny. The role of High Judicial Council and State Prosecutorial Council in terms of the management of the judiciary, as well as in the supervision and control of the judiciary has been strengthened; their composition encompasses at least 50% of members, selected by their peers, from the ranks of judges and public prosecutors, stemming from different levels of jurisdiction (the role of the National Assembly is solely declaratory). The Constitution clarifies</p>	<ol style="list-style-type: none"> The judiciary in the Republic of Serbia is completely independent which is confirmed in the positive opinion of the Venice Commission on the new Constitution and the legal provisions relating to the judiciary; Judges and prosecutors are elected on the basis of their expertise and merit, which has an overall positive impact on the quality and efficiency of the judiciary; The High Judicial Council and the State Prosecutorial Council (established in accordance with European standards) successfully manage the judiciary with adequate financial resources, personnel elected with a clear mandate, while respecting the principles of transparency and accountability; All of the above is confirmed in the positive Annual report of the European Commission's on the progress of the Republic of Serbia, including the improvement of the provisions of the Constitution.

CURRENT STATE OF PLAY:

The legislative framework regulating anti-corruption in Serbia encompasses:

National Anti-Corruption Strategy for the period 2013-2018 ("Official Gazette of RS", No. 57/13); Action plan for the implementation of the National Anti-Corruption Strategy for the period 2013-2018 ("Official Gazette of RS", No. 71/13, 55/14); Law on Financing Political Activities ("Official Gazette of RS", No. 43/11 and 23/14); Law on Anti-Corruption Agency ("Official Gazette of RS", No. 97/08, 53/10, 66/11-CC, 67/13-CC and 8/15- CC); Criminal Code of Serbia ("Official Gazette of RS", No. 85/05 88/05, 107/05, 72/09, 111/09, 121/12, 104/13); Law on Free Access to Information of Public Importance ("Official Gazette of RS", No. 120/2004, 54/2007, 104/2009 and 36/2010); Law on Public Procurement ("Official Gazette of RS", No. 124/12); Law on Privatization ("Official Gazette of RS", No. 83/14); Criminal Procedure Code ("Official Gazette of RS", No. 72/11, 101/11, 121/12, 32/13, 45/13 and 55/14); Law on Seizure and Confiscation of the Proceeds from Crime ("Official Gazette of RS", No 32/13); Law on ratification the UN Convention against Corruption ("Official Gazette of Serbia and Montenegro - international contracts", No. 12/2005).

In the Republic of Serbia there is developed consciousness and political will to eliminate corruption to the fullest extent, in order to achieve economic, social and democratic development of the country. The consequences of corruption are mostly linked to the impoverishment of society and the state, the drastic decline in trust in democratic institutions, as well as uncertainty and instability of the economic system. The Republic of Serbia is committed to achieving significant progress in the fight against corruption, with respect for democratic values, the rule of law and protection of fundamental human rights and freedoms.

The Republic of Serbia has ratified all major international instruments in the fight against corruption. Generally, laws and regulations are partly compatible with accepted international standards. To identify deficiencies in the legislative solutions, the representatives of the Republic of Serbia are actively involved in the compatibility assessment conducted by European and international organizations, such as the evaluation by the Group of States against Corruption (GRECO) and the UN Office on Drugs and Crime. Plan to harmonize the internal legal system with the EU *acquis* for the period 2013-2018, has been determined in the National Program for the Adoption of the *Acquis*. Basic guidelines for planning the necessary legislative changes used to represent the measures previously identified in the Action Plan for the National Anti-Corruption Strategy for the period 2013-2018.

In addition to these priority reforms established by the Action Plan for Chapter 23, subchapter fight against corruption, the Republic of Serbia is on a sound course of a comprehensive fight against corruption identified in the National Anti-Corruption Strategy in the Republic of Serbia for the period 2013-2018 (Strategy) and accompanying Action Plan. The above strategic documents envisage extensive field for the fight against corruption, such as political activities, public finance, privatization and public-private partnerships, the judiciary, the police, planning and construction, the media, as well as prevention of corruption. Implementation of these measures will be harmonized with the European Commission's recommendations and measures of priority reforms following the adoption of the Action Plan for Chapter 23.

The Strategy and the accompanying Action Plan also provide a range of concrete measures against corruption in the vulnerable areas such as: health care, taxes, education, police, customs and local self-government. Practical implementation of planned measures shall represent an indicator of progress in the fight against corruption in these particularly high-risk areas. Therefore, it is necessary to collect relevant data on the extent and manner of implementation of the measures envisaged, in order to determine their effect and anticipate next steps for continuing the fight against corruption in high-risk areas. A large part of the necessary reforms is related to the establishment of an appropriate legal, institutional and administrative framework. Upon the establishment of the above key foundations for the fight against corruption in high-risk areas, relevant indicator of progress will be consistent implementation of the established mechanisms in practice.

IMPLEMENTATION OF ANTI-CORRUPTION MEASURES

The institutional design in implementation of anti-corruption measures encompasses: Coordination body for the implementation of the Action plan for the Implementation of the National Anti-Corruption Strategy in the period 2013-2018 (Coordination Body), Anti-Corruption Agency (ACA), Anti-Corruption Council (Council).

The system for coordination and monitoring the implementation of anti-corruption documents has been established for effective implementation of strategic documents in the field of anti-corruption.

Coordination of measures from anti-corruption strategies shall be performed by the Coordination body. The Ministry of Justice (MOJ) shall provide administrative support to the Coordination body through the Group for Coordination (the Group).

The Council and MOJ shall participate in the process of coordination.

As the fight against corruption represents one of the key priorities, the Government of the Republic of Serbia adopted the Decision on the establishment of the Coordination Body on August 7th 2014. The head of the Coordination Body is the Prime Minister. Members of this body are: ministers in charge of judiciary and finance and one member of the Anti-Corruption Council. Ergo, coordination is performed at the highest political level. The Prime Minister as a person of the highest authority in the country shall resolve all the problems that arise in the implementation

of the strategic documents and direct the implementation of anti-corruption measures and strategic documents. The Prime Minister holds meetings at least once in six months. Competencies of the Coordination body shall be extended by amending the Decision on the establishment of the Coordination Body to also include the implementation of the Action Plan for Chapter 23, subchapter fight against corruption.

On the political-technical level, the State Secretary in charge for anti-corruption (at the MOJ) shall participate in the work of the Coordination body through coordination of the state bodies. Each state body responsible for the implementation of the Action plan shall determine one contact person for the communication with the State Secretary in charge of Anti-corruption at the MOJ. Also, Office for Cooperation with civil society shall determine one contact person for the communication with the State Secretary in charge of Anti-corruption at the MOJ. State Secretary in charge of anti-corruption, with the support of the Group, shall maintain bilateral and multilateral meetings with other state authorities, stakeholders of the Strategy and Action Plan. State Secretary in charge for anti-corruption at the MOJ shall hold quarterly meetings with all stakeholders of the Strategy and Action Plan. The State Secretary in charge for anti-corruption at the MOJ and the Group shall represent a link between all state authorities - stakeholders of the Strategy and Coordination body.

Monitoring the implementation of anti-corruption measures is performed by the independent state body Anti-corruption Agency (ACA). ACA shall monitor the implementation of anti-corruption strategic documents, pursuant to the law governing the establishment and jurisdiction of ACA. The competencies of ACA shall be extended by amending the Law on Anti-Corruption Agency to also include the implementation of the Action Plan for Chapter 23, subchapter fight against corruption. In order to foster fight against corruption, ACA and MOJ are achieving full cooperation.

PREVENTION OF CORRUPTION

The legislative framework regulating prevention of anti-corruption in Serbia encompasses:

Law on Financing Political Activities (“Official Gazette of RS“, No. 43/11 and 23/14); Law on Anti-Corruption Agency (“Official Gazette of RS“, No. 97/08, 53/10, 66/11 –CC, 67/13-CC, and 8/15-CC); Law on Free Access to Information of Public Importance (“Official Gazette of RS“, No. 120/2004, 54/2007, 104/2009 and 36/2010); Law on Public Procurement (“Official Gazette of RS“, No. 124/12); Law on Privatization (“Official Gazette of RS“, No. 83/14).

The most important bodies representing institutional framework in this matter are: Anti-Corruption Council (Council), Anti-Corruption Agency (ACA), Commissioner for Information of Public Importance and Personal Data Protection (the Commissioner), State Audit Institution (SAI). The key issues in the field of prevention of corruption involve: conflicts of interest, financing political activities, access to information of public importance, public procurement, protection of whistleblowers, professionalization and integrity of public administration.

The key measure for prevention of corruption in the Action Plan for chapter 23 is the adoption of new Law on Anti-Corruption Agency. This Law shall regulate the field of prevention of corruption in a comprehensive manner.

The task of the Anti-corruption Council is to: review the activities in the field of fight against corruption, to propose to the Government measures to be taken in order to effectively fight against corruption, monitor their implementation, and take initiatives for the adoption of regulations, programs, and other acts and measures in this field. As an advisory body of executive power, Anti-Corruption Council used to regularly prepare and submit reports and initiatives to the Government on the phenomena of corruption, systemic corruption, but there was lack of interactive relation between the two bodies. The envisaged measures are presented below and their implementation will ensure that the Government and competent state authorities systematically review reports and initiatives of Anti-Corruption Council in implementing measures in the field of fight against corruption.

The Anti-Corruption Agency (ACA) is an independent state authority, which reports to the National Assembly for its operation. Law on the ACA provides a wide range of responsibilities of the Agency relating to resolving the incompatibility of public offices and conflict of interest, controlling the assets of public officials and keeping a register of public officials, property and gifts; controlling the financing of political subjects, addressing the complaints of citizens, education, supervision over the implementation of the strategic framework, the analysis of regulations, and so on.

The adoption of the Law on Financing Political Activities the Republic of Serbia has significantly improved the legal framework in this area and fully implemented the recommendations of GRECO. The Anti-Corruption Agency, on May 31st 2013, presented the First report on the control of financing of political entities - the election campaign after the elections in 2012. Implementation of the Law indicated that the changes of certain legal provisions would lead to better implementation in practice, and in particular the provisions concerning the mechanisms for control of financial reports, obligation to deliver financial reports and sanctioning. So far, not even one external audit of political entities was performed, because they were not envisaged by law as compulsory subjects of the audit of the State Audit Institution (SAI). An additional problem in this area is the lack of the necessary capacity of authorities responsible for the control of funding. Law on amendments and supplements of the Law on Financing Political Activities ("Official Gazette of RS", No. 123/14) introduced certain novelties in this area: political parties now have the opportunity to buy real estate from the budget sources with condition that real estate is used only for purposes of performing political activities; annual financial reports are now submitted to the Anti-Corruption Agency instead to the Official Gazette; sources for financing of regular activities of political subjects are now used also for financing costs of election campaign.

Mechanisms for the prevention and elimination of conflicts of interest in Serbia have been improved by adopting the Law on the ACA which governs the issue of conflicts of interest that applies only to officials performing public functions. Legal provisions preventing conflicts of interest do not exist or only partially exist for other employees in state bodies and organizations. Inconsistency of legislation in this area is described as the main obstacle in the annual report of the Anti-Corruption Agency in 2013. The lack of a coherent legal framework that would create the same mechanisms for the prevention and elimination of conflicts of interest for all employees in the public sector is hampering the fight against this phenomenon. Consequently, awareness of the concept of conflict of interest and methods for its prevention are not sufficiently developed at all levels. As the Republic of Serbia ratified international instruments which, inter alia, regulate the issue of conflict of interest, it is necessary to undertake measures in order to harmonize legislation and implement international standards.

The UN Convention against Corruption recommends Member States to consider introducing a crime "Illicit enrichment" if it was in accordance with the Constitution and the fundamental principles of the national legal system. The criminal legislation of the Republic of Serbia still does not provide the alleged offense, given that it may be contrary to the fundamental principles of criminal law and the principles of individual responsibility of the offender. On the other hand, the Anti-corruption agency has the authority to monitor and control the reporting of assets and revenue of officials, and in the case of possible irregularities identified, there are no clear mechanisms for sanctioning. Control of assets and income is particularly important from the aspect of implementation of financial investigations and tracing criminal proceeds. National Anti-Corruption strategy for period 2013- 2018, identified the need for a comprehensive analysis of the institutional and legal framework for finding effective solutions for cases of illicit enrichment. The chapter on criminal offenses against the economy of the Criminal Code of Serbia) is harmonized to a great extent with the Criminal Law Convention on Corruption, the UN Convention against corruption, the Convention on the fight against corruption of foreign officials in international transactions and other international instruments. The GRECO report on Serbia's compliance with the recommendations analyzed the criminal offenses of corruption in the third round of evaluation and offered five recommendations for improvement. Additional report on implementation has been sent to GRECO Secretariat. GRECO concluded that Serbia has implemented satisfactorily fourteen of the fifteen recommendations contained in the Third Round Evaluation Report. By that, the third round compliance procedure in respect of Serbia has been finished. However, there is a need to fully align the chapter on criminal offenses against the economy of the Criminal Code with international instruments. In addition, new methods of performing economic crimes require modernization and improvement of criminalization in national legislation. This need has been recognized in the National Anti-Corruption Strategy for the period from 2013 to 2018, and the accompanying Action Plan, providing for the improvement of economic and corruption offenses in the Criminal Code.

The right of citizens to access information of public importance has been established by the Law on Free Access to Information of Public Importance. Despite the fact that the current law is based on high international standards of exercising the rights from the perspective of methods for the protection of the rights, authorities coverage, the number and nature of exceptions to the principle of free access to information and similar criteria, nine-year old practice of application of this law shows that improvements are necessary. All improvements will be done in accordance with Conclusion of National Assembly issued by Assembly's competent body for 2014. From the standpoint of the legal framework for the exercise of the right of access to information, it is important that the Government, on the initiative of the Commissioner, determined the liability of public authorities to obtain the opinion of competent institutions in the process of adopting regulations through the amendment of the Government's Rules of Procedure, and enabled the availability of materials and information to the public through the amendment of the Rules of the obligation of public debate in drafting laws.

The Republic of Serbia has a legal framework that guarantees a wide range of public access to information of public importance, which is a fundamental right in a democratic society. The implementation of regulations in this area, in connection with the respect of the right to personal data protection and the presumption of innocence, still represents a challenge. Exposure of the details of investigations based on anonymous sources of information that was "leaked" from police action or criminal prosecution, may jeopardize the investigation, undermine the presumption of innocence and violate the right to privacy. In such cases, the absence of adequate response against persons who have exposed sensitive and confidential information from the investigation is notable. The aim of the regulations on personal data protection is the protection of fundamental human rights, which requires that the information can only be obtained in accordance with the law - under strict conditions and for the purposes defined by law. Therefore, it is necessary to strengthen internal control mechanisms and sanctioning to prevent the disclosure of confidential information to the media.

One of the main goals of the previous Public Administration Reform Strategy (PAR Strategy) for the period 2004 - 2013 was the professionalization and de-politicization of public administration. Little progress was made in this field a, which is the reason why Public Administration Reform Strategy in Serbia, adopted in February 2014, provides a continuation of the ongoing reform activities and extends them with the system of state administration in the public administration system. The two key objectives of the new strategy relating to the de-politicization of public administration were the establishment of a harmonized public service system based on merit and promotion of human resource management, and the strengthening of transparency, ethics and accountability in the performance of public administration. Government of the Republic of Serbia adopted accompanying Action plan for the implementation of PAR Strategy on March 19, 2015, which further regulates numerous activities for realization of stipulated goals. It is planned to achieve the results in this area by introducing civil service system based on the principles of de-politicization, professionalization, as well as a model of progress and reward according to merit (merit system). Special attention is given to clearly and precisely define the requirements and criteria for candidate selection and promotion, especially in the case of managerial jobs, i.e. position. In the area of control mechanisms, regulations on internal audit and financial management and control are aligned with international standards, Central Harmonization Unit continued to direct the technical activities, in particular training and certification of internal audit.

Positive legal framework of the Republic of Serbia now does provide adequate protection for persons reporting suspicions of corruption or any other illegal actions (whistleblowers) as they may suffer some consequences and often the ones that affect their employment status. In accordance with previous reports on the progress of the Republic of Serbia in the process of European integration, while keeping in mind the United Nations Convention against Corruption, in response to perceived shortcomings of the existing system of protection, the National Anti-Corruption Strategy for the period 2013 - 2018, and the related Action Plan stipulated the obligatory enactment of a comprehensive law to regulate the issue of the protection of whistleblowers. The Law on protection of whistleblowers is adopted by the National Assembly on November 2014, and entered into force on June 2015. The main aim of the law is to establish an efficient and effective protection of whistleblowers. In addition to establishing an adequate legal framework, a series of measures for the effective implementation of regulations in practice and awareness raising about the importance and methods to protect whistleblowers are envisaged. For that purpose, official trainers hired by Judicial Academy, conducted nearly 50 professional trainings for judges of all higher courts, for the territory of four Appellate courts in Serbia. In domain of anti-corruption legislation, Serbia still lacks a law which would regulate lobbying activity, although the adoption of this law is identified as crucial in the fight against economic and political bribery.

The Law on Public Procurement (as follows: PPL) provided a series of measures to strengthen control and supervision over its implementation. There are special provisions on the prevention

of corruption and conflict of interest, as well as greater transparency in public procurement procedures. The Public Procurement Office (PPO) and the Republic Commission for the Protection of Rights in Public Procurement Procedures (RC), were given new powers and greater authority. PPO supervises the implementation of the Law on Public Procurement. In order to prevent unreasoned implementation of the negotiation procedure without a prior public call, an obligation to obtain the prior opinion of the PPO was introduced. It is introduced that the PPO and the State Audit institution (DRI) monitor procurement plans and the merits of changes to public procurement contracts. A longer statute of limitations for violations of Public Procurement (3 years) is prescribed. PPO has received authorization for initiating misdemeanor proceedings, while the RC is responsible for prosecution in the first degree. Both institutions are responsible for initiating the procedure for the determination of void public procurement contract. RC in cases prescribed by law terminates public procurement contract, impose fines and decides on prohibition of misuse of right to petition for protection of the right. A key problem during the past year of implementing the new system of supervision and control of the implementation of the Law on Public Procurement is the limited administrative capacity of PPO, above all in terms of personnel. It is also necessary to analyze the effects of all mechanisms of supervision and control, and in accordance with the findings of the analysis make changes through amendments to the Public Procurement Law, as well as make recommendations in respect of other legislation. Cooperation between the institutions in the system of supervision and control is significantly improved from the beginning of implementation of the Law on Public Procurement on April 1st 2013, but it is necessary to work on its further improvement.

Privatization process in Serbia has proved to be one of the most critical areas of corruption. The report of the Anti-Corruption Council and many other indicators point to a number of irregularities that have occurred due to a series of inaccuracies and non-transparency of the privatization legislation. Such vagueness of regulations has created numerous opportunities for abuse. In addition, many of the privatization contracts contain violations of the equivalence of benefits, which was enabled by inadequate control, both in terms of performance of the contract, and in the exercise of powers of the Director of the Privatization Agency. The National Anti-Corruption Strategy in the period from 2013 to 2018 provides a number of measures to prevent corruption in the privatization process. They can be grouped into two categories: changes of the corruptive provisions of the rules and improvement of the conduct of the competent authorities in the detection and prosecution of criminal offenses in the privatization process. New Law on Privatization ("Official Gazette of RS" No. 83/2014) was adopted in order to improve the legal provisions of the privatization process and eliminate the deficiencies that have led to numerous abuses. The adoption of the new law represents the beginning of implementation of the Action Plan for implementation of the Strategy, which provides a number of other measures to improve these areas.

Article 55 of the Constitution guarantees freedom of political, union or any other association and the right to stay out of any associations, and associations are established without prior approval, by registration in the register kept by the state authority in accordance with the law. In this regard, in January 2011, the Government established the Office for Cooperation with Civil Society Organizations (Office) to support the development of civil dialogue between government institutions and civil society organizations in the process of the reform of the institutions and society in general. The importance and the role of the Office are reflected, inter alia, in the establishment of clear standards and procedures for the involvement of civil society at all levels of decision-making. In recent years, civil society has been very active in monitoring and evaluating the work of public authorities in this field, through public hearings, conferences, round tables and debates organized by various civil society organizations and government institutions. In terms of the development of the National Anti-Corruption Strategy from 2013 to 2018, and the accompanying Action Plan, representatives of civil society organizations were involved in all phases of the aforementioned acts, which have been contributed by their comments, suggestions and proposals. This has resulted in the adoption of the strategic objectives relating to the creation of conditions for active participation of civil society in the fight against corruption.

REPRESSION OF CORRUPTION

The legislative framework regulating repression of corruption in Serbia encompasses:

Criminal Procedure Code ("Official Gazette of RS", No. 72/11, 101/11, 121/12, 32/13, 45/13 and 55/14); Law on Seizure and Confiscation of the Proceeds from Crime ("Official Gazette of RS", No 32/13); Criminal Code of Serbia ("Official Gazette of RS", No. 85/05 88/05, 107/05, 72/09, 111/09, 121/12, 104/13). Institutional repressive apparatus consists of: police (detection of corruption offenses), public prosecutors (prosecution of corruption), courts (sanctioning corruption).

The key measure in the field of repression of corruption is the adoption of the Financial Investigations Strategy. This Strategy is an integrative document for the largest number of anti-corruption repressive measures. Responsible authorities for the implementation of this Strategy are Ministry of Justice and Public Prosecutor's Office. The Financial Investigations Strategy from 2015 through 2016, along with the new Law on ACA (in the prevention field) represent the pillars of the Action Plan for Chapter 23, subchapter fight against corruption.

Established efficient and proactive action in detecting and prosecuting corruption and organized crime represents the basis of the repressive action against these phenomena. The key prerequisites for effective acting involve independent competent institutions, adequate staffing, effective horizontal and vertical cooperation established and exchange of information between the police, public prosecutors, courts and other state bodies and institutions. The Financial Investigations Strategy from 2015 through 2016 prescribes specialization in economic crime matters in police, prosecution offices and four appellate courts, advanced trainings in cooperation with the Judicial Academy of judicial officers (in four Appellate courts) who handle financial investigations, establishment of task forces comprised of police officers and officers of other relevant government authorities, appointment of liaison officers for contact with the prosecutor's office and the police in every authority which comes across facts connected to financial crimes. Regarding introduction of forensic accounting offices within Public Prosecutor's offices, the Prosecutor's Office for Organized Crime should have at least two forensic accountants, while departments in the four higher prosecutor's offices should have minimum of one forensic accountant. A forensic accountant should be able to identify criminal activity from the financial standpoint, but he should also be familiar with investigation and evidentiary techniques. Forensic accountants need to assist public prosecutors in finding answers that they cannot provide because of the complexity of the case. In a domain of repression of corruption, proper implementation of the Financial Investigations Strategy activities will represent key contribution for reformation of repression system, prioritization of the work on 24 controversial privatization cases from current phases to satisfactory resolution in line with Anti-Corruption Council recommendations. Also, implementation of the Financial Investigations Strategy will represent adequate tool for resolving financial criminal cases in future. When it comes to 24 controversial privatization cases, Republic of Serbia is demonstrating strong will to resolve all cases, and the state of play is as follows: one case is in pre-investigation proceedings, nine cases are in investigation proceedings, main trials are in process for seven cases, one case is adjudicated and there were no grounds for initiating criminal proceedings in respect in four cases.

The need for cooperation with national and European institutions and organizations, as well as other international organizations (Eurojust, OLAF, GRECO, OECD, etc.) is particularly emphasized. With the entry into force of the new Criminal Procedure Code, in all public prosecutors' offices, of general and special jurisdiction, the prosecution has obtained a leading role in obtaining evidence and their presentation in court. Certain results have been achieved in practice; however, further progress is necessary particularly in cases of high level corruption. Improving financial investigations is one of the prerequisites for achieving significant results in practice, in addition to strengthening the independence and mutual information exchange between relevant authorities. (See further Chapter 24, subchapter fight against organized crime.)

In the Republic of Serbia, the police, prosecution and courts use different systems for monitoring criminal cases. In practice, such an approach creates a number of problems. The police keeps statistical records according to the number of reported crimes; the prosecution according to the number of reported persons; whereas the court statistics is kept according to the number of cases. Such record keeping is not suitable for measuring the progress and the level of efficiency of the criminal justice system, neither for setting up criminal policy. The goal of establishing a unique records keeping system or an electronic record for criminal offenses with elements of corruption is, inter alia, the precise systematization and classification of data as well as regular control and information exchange. One of the tasks this information system has to correspond to is to establish a uniform system of reporting on corruption and organized crime. By achieving this goal, the Ministry of Justice shall have the ability to produce reliable annual report on cases with elements of corruption, which contain all the relevant information about the course of the investigation, the progress of the criminal proceedings and their outcome. Mutually compatible forms in the police, courts and prosecutors' offices should also include the possibility of monitoring cases of proactive conduct, acting upon the reports of the Agency, State Audit Institution, Tax Administration, and Administration for public procurement, etc.

The legal framework for conducting financial investigations and tracing criminal proceeds is regulated by the Law on Seizure and Confiscation of the Proceeds from Crime ("Official Gazette of RS", no. 32/2013). Also, the Criminal Procedure Code ("Official Gazette of RS", no. 72/2011, 101/2011, 121/2012, 32/2013, 45/2013 and 55/2014) provides for special investigative

techniques that are used to facilitate tracking of the proceeds from crime. Competent authority for the implementation of financial investigation is the Financial Investigation Unit, responsible for financial investigation at the Ministry of Interior, while the Directorate for Administration of Seized Assets is responsible for the management of seized assets within the Ministry of Justice. The National Anti-Corruption Strategy for the period of 2013-2018, provides for measures to improve the implementation of financial investigations and management of seized assets. It is necessary, inter alia, to improve the efficiency of relevant institutions, records keeping and information exchange at the national and international level.

Pursuant to the Constitution of the Republic of Serbia, the following categories of persons shall enjoy immunity: MPs, the President of the Republic, the President and members of the Government, the judges of the Constitutional Court, judges, public prosecutors and deputy public prosecutors, the Ombudsman, members of the High Judicial Council and State Prosecutorial Council. Parliamentary immunity includes substantive immunity (immunity from liability and the procedural immunity. A judge may not be detained in proceedings instituted for a criminal offense committed in the performance of judicial functions without the approval of the High Judicial Council. Member of High Judicial Council shall enjoy immunity as a judge. A public prosecutor and deputy public prosecutor cannot be held responsible for the opinions expressed in the exercise of prosecutorial functions, unless it is a criminal offense of violating the law by the public prosecutor or deputy public prosecutor. A public prosecutor and deputy public prosecutor may not be deprived of liberty in proceedings instituted for a criminal offense committed in the exercise of prosecutorial function or service, without the approval of the competent committee of the National Assembly. Member of the State Prosecutorial Council shall enjoy immunity as a prosecutor. A judge of the Constitutional Court shall enjoy immunity as a deputy. The Constitutional Court decides on his/her immunity.

REFORM ACTIVITIES COMPLETED DURING THE PROCESS OF DRAFTING OF THE ACTION PLAN (SEPTEMBER 1st 2014- JUNE 15th 2015)

During the drafting of Action Plan for CH 23, Subchapter Fight against corruption, several important activities were successfully or partially implemented. Three activities have been successfully implemented, concerning introducing program budgeting and adoption of Financial Investigations Strategy from 2015 through 2016 and implementation of the Law on whistle-blowers started from June 5th, 2015. In respect of whistle-blowers, appropriate by-laws were also adopted. Three activities have been partially implemented. As a follow up of implementation of the Law on whistle-blowers, in cooperation with the Judicial Academy a training program is organized for judges in four appellate courts. Other activity which is partially implemented is related to adoption of the new Law on Anti-Corruption Agency through establishing the working group for drafting the Law on ACA, which holds meetings on weekly basis. Also, regarding the adoption of the Law on Amendments and Supplements to the Law on Seizure and Confiscation of the Proceeds from Crime in accordance with the previously conducted analysis aimed at improvement of efficiency in line with the 2014/42/EC Directive, working group is established and holds regular meetings. In addition to abovementioned activities, the working group for drafting amendments and supplements on Criminal Code done new draft of Criminal Code, and the working group for drafting amendments and supplements on Law on organization and jurisdiction of government authorities in combating organized crime and corruption is established. Analysis with the aim to establish a system of regular and mandatory coordination between the Anti-Corruption Council, Agency for Privatization and appropriate government agencies and state authorities for the purpose of establishing proactive approach in retention of risk of corruption in the field has been conducted. Finally, significant efforts have been made towards conceptualization of task force methodology, and for that purpose several advanced trainings have been conducted.

3. FUNDAMENTAL RIGHTS

CURRENT STATE:

The Republic of Serbia will continue to improve its legal and normative framework for the protection and promotion of fundamental rights, in line with the EU *Acquis*, European and international standards and best practices.

Prohibition of torture, degrading and ill-treatment and punishment

In the field of prevention and prohibition of torture and ill-treatment, the Republic of Serbia plans to strengthen the capacity of the Ombudsman, particularly with regard to its role as a National Preventive Mechanism, through the provision of the necessary number and structure of employees for the efficient performance of duties and improvement of organizational, functional and financial independence. Also, by establishing specific communication channels between police officers, NPM and civil society organizations, it is planned to increase the level of coordination and raise general awareness about the necessity of full elimination of all forms of torture. Through initial and continuous training for police officers, staff at the institutes for enforcement of criminal sanctions and enforcement judges, a higher level of expertise and awareness of the necessity to establish zero torture tolerance shall be achieved. The existence of adequate infrastructure at the institutes for enforcement of criminal sanctions is an important aspect of the prevention of torture, hence the Republic of Serbia plans to invest considerable efforts to build new institutes for enforcement of criminal sanctions during the implementation period of the Action Plan for Chapter 23, and restore the existing facilities. In addition to the renewal of the facilities, considerable attention will be paid to the improvement of conditions in the Special Prison Hospital in Belgrade. In addition to the infrastructure of the institutes for enforcement of criminal sanctions, significant efforts will be made to improve the infrastructure of the detention facilities in police stations.

The problem of overcrowding in the institutes for enforcement of criminal sanctions will be addressed on two tracks, both through infrastructure investments as well as through the development and further improvement of the system of alternative sanctions.

In the formulation of measures for the prevention and suppression of torture and ill-treatment, special attention is paid to the Recommendations of the European Committee for the Prevention of Torture and Inhuman or Degrading Treatment or Punishment i.e. the implementation of the recommendations is the main focus of all activities in this area.

Freedom of thought, conscience and religion

In the domain of freedom of thought, conscience and religion, it is necessary to conduct a detailed comparative analysis of the legal status of churches and religious communities, taking into account the specificities of European legal tradition in this domain and cultural characteristics of the region Serbia belongs to. The analysis will be based on the idea proclaimed in the Constitution of the Republic of Serbia, which states that churches and religious communities are equal and free to independently regulate their internal organization, religious affairs, to perform religious rites. The neighboring countries of the Republic of Serbia will represent the paradigm for this analysis, given that they have already met the criteria for membership in the EU. The abovementioned approach is based on the cultural similarities of the countries in the region and the fact that the same religious communities are extended across these countries, but also given the need to use the know-how of countries that have already experienced the process of integration. Following the performed analysis, all necessary measures to implement the recommendations of the analysis will be undertaken to enable full alignment with the identified standards and best practices. To this end, a comprehensive dialogue with the Serbian Orthodox Church will be fostered with a view to encouraging the use of minority languages in the services where possible and appropriate and ensure that there was no unjustified limitation of the right of persons belonging to national minorities to practice their religion in their mother tongue.

Freedom of expression, including freedom and pluralism of the media

Through consistent implementation of a set of new media laws that came into force in the beginning of August 2014, full withdrawal of the state from media ownership will be achieved, which is one of the main strategic objectives of the Strategy for Development of Public Information System in the Republic of Serbia in 2011. Moreover, implementation of the recommendations of the Anti-Corruption Council will ensure greater transparency of media ownership as well as clear set of rules on direct and indirect budget support for the media. Frequent threats and violence against journalists have been recognized as a serious threat to freedom of expression and media pluralism. In order to overcome this challenge, it is necessary to strengthen coordination between all competent authorities and raise awareness on the importance of the protection of journalists, both through training and prioritization of these cases, which will represent the key focus in the following period.

Information leaks regarding planned and ongoing criminal investigations have been perceived as a serious threat to the efficiency of the investigation, the presumption of innocence and privacy of personal data. It is planned to end these negative practices through the development of new operational procedures, capacity building through training and effective coordination of the competent authorities.

Principle of anti-discrimination and position of socially vulnerable groups

In the following period, the Republic of Serbia plans to achieve full alignment the Law on anti-discrimination with the EU *Acquis*. Through planned adoption of the Action Plan for the implementation of the Strategy of Prevention and Protection Against Discrimination for the period from 2014 to 2018, and its consistent implementation and active monitoring, improvement of the position of the most vulnerable social groups will be achieved.

Through dedicated work, the Commissioner for Protection of Equality, as a central national body specialized in combating all forms and types of discrimination and prevention of discrimination, led to a significant increase of awareness on discrimination. Strengthening its capacity in the forthcoming period is necessary in order to additionally improve the protection and prevention of discrimination.

Positive progress has been made in improving the situation of the LGBTI community. This will continue through the implementation of the section of the Action Plan for the implementation of the Strategy of Prevention and Protection Against Discrimination for the period from 2014 to 2018, which refers precisely to this vulnerable group, as well as through ongoing consistent implementation of the Law on anti-discrimination. Through the development of a model of community policing and continuous cooperation with the representatives of the LGBTI community by designating contact persons, the work on the improvement of safety of all members of the LGBTI community will continue.

In the forthcoming period, the good practice of raising awareness about the prohibition of all forms of discrimination and methods for its prevention is planned to continue, which will be achieved through a series of educational roundtables, training of citizens and civil servants, and printing and distributing manuals for recognizing and responding to discrimination.

Gender equality

In the forthcoming period, the Republic of Serbia plans to pay due attention to the promotion of the principle of gender equality, including mainstreaming gender equality issues in relevant policy areas, both at strategic and legislative level, as well as to strengthen capacity of the institutions and their mutual coordination. The existing legal framework on gender equality has not adequately regulated the field of gender equality, it is not aligned with undertaken international obligations in the field of gender equality and subsidiary legislation and contains numerous deficiencies which hinder or complicate comprehensive implementation of the principle of gender equality in practice. The Government of the Republic of Serbia recently established a Coordinating Body for gender equality that will address all the related issues and coordinate the work of state administration in relation to gender equality, in order to ensure that all the available mechanisms (national, provincial and local) operate in an efficient and consistent manner. In the forthcoming period, the Republic of Serbia will develop a new multiannual National Strategy for improving the status of women and promoting gender equality in order to ensure gender equality in practice. The new Strategy will

build on the achieved results and provide feasible solutions for the identified implementation obstacles of the previous strategy. New Strategy will be aligned with gender dimension of the EU 2020 strategic framework, particularly focusing on economic empowerment of women, combating gender based violence, and participation of women in public life, including specific measurable impact indicators which will be used for monitoring implementation..

In addition, through the adoption of a new Strategy for the protection of women against violence, the Republic of Serbia shall endow the necessary efforts to align with the Istanbul Convention, in particular through analysis and the necessary amendments to the current legislative framework for the protection of women against violence. The planned legislative changes shall include the introduction of safe houses, counselling services, state-wide telephone helplines free of charge, treatment support programs aimed at preventing perpetrators, in particular sex offenders, from re-offending, due diligence principle as well as multi-sectorial cooperation and CSO involvement.

Rights of the child

The work of the Council for the Rights of a Child will be intensified to achieve a higher level of coordination of all state bodies responsible for the implementation of strategic documents in the field of the rights of a child. In addition, through an inclusive and transparent process, a new strategic framework for the protection of children from violence will be developed, in order to carry on with the development and improvement of the existing framework, based on the previous experiences.

The work on increasing the number of children who benefit from family support measures will be continued, in order to reduce the necessity to use alternative care, the placement of children in residential institutions or foster care, whereas in the case of necessity to use alternative care, placement in the family-like environment in the local community will be emphasized, while gradually increasing the availability of different alternative care options, selected on the basis of each individual case. Efforts will be made to strictly control and reduce the number of children placed in residential institutions. In addition, efforts shall be made to increase the number and type of services for particularly vulnerable children (children living and working in the street, children with disabilities, children living in poverty and etc.).

For the purpose of full implementation of the European standards, the work on improvement of the juvenile justice system will be continued, in particular by enabling that the number of children who benefit from the child-oriented judiciary increases annually through the wider use and the introduction of new educational orders, adjusted preparation for release, performed by trained judicial and other professionals, better infrastructure and wider use of alternative sanctions.

Procedural safeguards

The establishment of a functioning free legal aid system shall commence by the adoption of the Law on Free Legal Aid and its implementing bylaws. Introduction of this system will significantly facilitate access to justice for all citizens and particularly those who are most vulnerable.

The amendments and supplements to the Criminal Procedure Code will enable full harmonization with EU directives in the field of procedural safeguards, enabling additional guarantees for the exercise of the right of suspects or accused persons to access a lawyer, the right to information and the right to interpretation and translation.

The amendments to the normative framework will also be performed to achieve full alignment with the Directive 2012/29 / EU regarding the rights, support and protection of victims of crime / injured parties. Through the establishment of victim support services, another aspect of access to justice shall be improved. Also, through a series of trainings for all relevant stakeholders, the necessary capacities for full implementation of the new procedural safeguards shall be strengthened.

Position of national minorities

With regard to the position of national minorities, the Republic of Serbia plans to draft an Action Plan for the exercise of the rights of national minorities. The above-mentioned Action Plan will focus on the implementation of the existing legal framework, which has been rated as very good, but with inconsistent levels of implementation. In the process of development of the abovementioned Action Plan, the Republic of Serbia will focus on the relevant recommendations set out in the Third opinion of the Advisory Committee on Serbia in the context

of the Council of Europe Framework Convention for the Protection of National Minorities. In all stages of this extremely important strategic document, major importance will be dedicated to full inclusion of all stakeholders, i.e. the councils of national minorities, civil society organizations and all relevant public authorities. The principle of transparency will be respected at all stages of design, implementation and monitoring over the implementation of this Action Plan. In order to facilitate full implementation of the Action plan within determined timelines, a monitoring mechanism will be established. Responsible authority for monitoring will be the Council for national minorities, whereas administrative support will be provided by the Office for human and minority rights. All responsible authorities provided in the Action plan shall submit reports on implementation of activities every two months to the Office for human and minority rights, which shall compile implementation reports for the Council for national minorities. In case that timelines set in Action plan are not met, the Council for national minorities shall use its political authority to foster efficient implementation by the respective ministries and request additional reports if necessary.

As part of the efforts to improve the situation of the Roma minority, a new multi-annual strategy and action plan for improving the living conditions of Roma will be developed in the forthcoming period. In the development of these strategies, the experience in implementation of the previous strategy as well as comparative legal experience of our partners in the EU will be utilized. The aforementioned strategy will focus on the most important areas of life, particularly paying attention to the following areas: personal documents, comprehensive measures of protection against discrimination, compliance with international standards in the forced evictions, equal access to health and social care, equal access to education, equal access the labor market and improvement of housing condition. Along with the strategy, a detailed action plan will be developed to enable its effective implementation. In the development of the planned activities, particular attention is given to the Operational Conclusions of the 2015 Social Inclusion Seminar: Roma Issues in the Republic of Serbia. On behalf of the Government, the Deputy Prime Minister and Minister of Construction, Transport and Infrastructure will coordinate the efforts of public authorities, including local governments and public enterprises, geared towards improving the position of the Roma and their full inclusion in the social, economic, cultural and political life, with emphasis on areas in which they are the most vulnerable (civil registration, education, housing, health, social protection and employment).

Position of refugees and internally displaced persons

In the forthcoming period, significant efforts will be made to improve the living conditions of refugees and internally displaced persons.

Significant financial resources will be invested to resolve housing problems of the most vulnerable families, particularly those who are still placed in collective centres, both through to the construction of new housing units and the provision of necessary construction materials to enable the closure of all formal collective centres. The provision of complementary measures aimed at sustainable integration of refugees through programs aimed at the economic empowerment will continue.

The introduction of a free legal aid system available to refugees and internally displaced persons will enable a higher degree of legal certainty and facilitate access to personal documents through the procedures prescribed by the Law on non-contentious proceedings, aimed at elimination of "legally invisible persons" through the registration and provision of identity documents.

Measures against Racism and Xenophobia

In the field of combating racism and xenophobia, in the following period measures will be undertaken in terms of legislative alignment with the Framework Decision 2008/913 / JHA on suppression of certain forms and expressions of racism and xenophobia by means of criminal law. Through amendments to the criminal legislation, compliance with paragraphs (c) and (d) of Article 1 of the aforementioned decision will be ensured, envisaging punishment of public approval, denial or gross trivialization of genocide, crimes against humanity and war crimes, as well as public approval, denial or gross trivialization of the crime in a way that can lead to violence or hatred against persons or groups of persons who are linked by common race, color, religion, ancestry, nation or ethnicity. Also, by amending the criminal offense of violation of equality (Article 128), in order to include its execution on the grounds of sexual orientation or gender identity to limit or deny the rights of any person, a higher degree of protection and prevention of hate crimes will be achieved.

Through the training of judges, prosecutors and police officers, improved knowledge and skills necessary for the effective prosecution of hate crimes will be provided, whereas the development and dissemination of educational materials, organization of annual forums and implementation of active media campaign will lead to a higher level of tolerance necessary for successful hate crime prevention.

Through the selection of new members and intensification of the work of the Action Team for development and implementation of a Strategy and Action Plan to combat violence and misbehavior at Sports Events, the supervision over the implementation of the Strategy will be enhanced, providing in this way adequate update the Action Plan for the implementation of this strategy.

Personal data protection

Through the development of detailed tables of concordance of the current Law on personal data protection with the EU *Acquis* in this field, a solid analytical basis for the amendments to the Law on Personal Data Protection shall be provided, providing a higher level of protection of personal data as well as full harmonization in this field. The adoption of bylaws that accompany the Law on Amendments to the Law on Personal Data Protection will enable full functionality and consistent implementation of these laws. Bearing in mind that the EU *acquis* in this field is being enhanced and that the Regulation of the European Parliament and of the Council on the protection of individuals with regard to the processing of personal data and on the free movement of such data (General Data Protection Regulation COM 2012 11), is in EU legislation pipeline, Serbia shall further align its legislation accordingly.

Amendments and supplements to the Law on Personal Data Protection will lead to changes in responsibilities and organization of the Commissioner for Information of Public Importance and Personal Data Protection, and in accordance with these changes it will be necessary to develop a new Rulebook on internal organization and job systematization and implement it in order to strengthen the capacity of the Commissioner.

REFORM ACTIVITIES COMPLETED DURING THE PROCESS OF DRAFTING OF THE ACTION PLAN (SEPTEMBER 1st 2014- JUN 1st 2015)

Prohibition of torture and inhuman or degrading treatment or punishment

Reconstruction of existing institutions in accordance with European standards is being successfully implemented. So far, one block was renovated and inhabited in the Belgrade District Prison, as well as in the Special Prison hospital in Belgrade. Pavilion was built for persons sentenced with the measure of compulsory psychiatric treatment. Concurrently, one block was renovated and inhabited and works are in progress for the second block in the Criminal Correctional Facility Valjevo, whereas project documentation is completed for the renovation of the Correctional Facility for Women Pozarevac. Construction of new buildings and departments in order to improve living conditions in prisons has initiated. Building project documentation is prepared for prisons in Pancevo and Kragujevac.

In order to ensure more effective judicial review and supervision over the rights of individuals deprived of liberty, the Law on Enforcement of Criminal Sanctions and the Rulebooks governing the status of persons deprived of liberty are printed and distributed. In addition, a Manual and a Handbook for prisoners and detainees as well as forms for the complaints and appeals are printed and distributed.

Position of the ombudsman, the provincial ombudsman and local ombudsmen

With regard to strengthening the capacity of the Ombudsman, the Rulebook on organization and job systematization at the technical service of the Ombudsman was adopted on the 31st session of the Parliamentary Committee on administrative and budgetary issues and received positive opinion. It is expected to be adopted at the plenary by the end of 2015.

Prison system

Two round tables and three visits to correctional facilities were organized so far as a part of continuous training of enforcement judges in the field of rights of individuals deprived of liberty, with the support of OSCE. Nationwide network of offices for alternative sanctions has been established by opening the remaining nine offices for alternative sanctions thus completing the network of 25 offices. Setting up of network of offices for alternative sanctions has been accompanied by continuous training for holders of judicial functions and new commissioners for alternative sanctions. Since September 2014, training was organized for 40 persons engaged in the alternative sanctions. Draft Rulebook governing enforcement of alternative sanctions is developed, and is expected to be adopted in autumn 2015. For the purpose of strengthening cooperation and establishing conditions for successful social reintegration of convicted individuals upon release, two protocols on cooperation of the offices for alternative sanctions and local self-government units have been signed in Valjevo and Nis.

Freedom of thought, conscience and religion

Legal experts have started performing comparative legal analysis regarding the regulation of the status of churches and religious communities in order to establish specific criteria aligned with best practices of the EU member states in the region, and analysis will be submitted by September.

Freedom of expression and freedom and pluralism of media

A new set of media laws (Law on Public Information, Law on Electronic Media and the Law on public service media) has been adopted in 2014 and implementation started. A conference was organized to promote new media laws and raise awareness among the stakeholders. Moreover, the Ministry of Culture and Information conducted series of trainings for judges engaged in media law, associations of journalists and the media, focused on the implementation of new media laws, promotion of best jurisprudence and European standards, as a part of the project “Strengthening media Freedom”. The activities towards the establishment of an efficient comprehensive and transparent Registry of the media ownership structure are ongoing and finalization is expected by August.

State Prosecutorial Council adopted the Communication Strategy of the State Prosecutorial Council and the Republic Public Prosecutor for the period 2015-2020, aimed at defining relationship, methods and scope of mutual communication as an effort to prevent media leaks regarding criminal investigations. Concurrently, the Commission for consideration of the facts obtained during the investigations conducted on the killings of journalists continued to work and provides relevant institutions with its key findings.

Principle of non-discrimination and social position of vulnerable groups

Action Plan for the implementation of the Strategy for prevention and protection from discrimination is adopted and is being implemented. The body for monitoring and supervision over the implementation of the Strategy and Action Plan for prevention and protection from discrimination, envisaged by the AP, held a first meeting and started operating. Initial data collection is in progress. Moreover, a mechanism of the Government of the Republic of Serbia for the implementation of all the recommendations of UN mechanisms for human rights is established.

The second meeting was attended by the Prime Minister.

With regard to Roma, an analysis on the effects of the Strategy for Advancing the position of Roma in the Republic of Serbia was performed and a report on its implementation is developed. Baseline study for the development of the Strategy for Roma Inclusion in Serbia aligned with the Europe 2020 Strategy is developed and adopted. Baseline Study is available on the website of the Office for Human and Minority Rights.

Multi-sectorial working group is established, tasked to develop new multiannual strategy for Advancing the position of Roma in the Republic of Serbia in cooperation with the group of experts, from among civil society, state administration and university. A new Roma Inclusion Seminar jointly organized by Serbia and the EU was held on 11 June 2015 and new set of operational conclusions has been utilized for the development of the activities in this AP. The functioning of the Council for the Improvement of the Position of Roma and the Implementation of the Roma Decade has been reviewed to become more operational. Solid foundations for a sustainable improvement of the position of the Roma have been laid, especially in the education sector, health sector and access to personal documents. Continuation of the process under the Memorandum of Understanding between the Ministry of Public Administration and Local Self-Government, the Ombudsman and the United Nations High Commissioner for Refugees is aimed, on the one hand, at further promoting the operation of and adherence to regulations by the competent authorities and, on the other hand, at providing free legal aid to persons who need to resolve any of the personal status rights, which will facilitate the exercise of this right until the free legal aid system is introduced.

Ministry of Education continued the implementation of affirmative measures through the mentoring system and scholarships for education. Scholarships for 528 students were awarded as of January 2015 retroactively for the school year 2014/2015. (Number of scholarships was increased in relation to the plan, due to consideration of the students affected by floods). Active measures were implemented to support employment of Roma through financial and non-financial support by the allocation of grants for self-employment and training. A call for Autonomous Province and local governments to participate in the financing of the program or measures of active employment policy in 2015 was announced and applications were submitted in February 2015.

Efforts to enhance housing conditions for the Roma population were invested in cooperation with Republic Agency for Housing. The total of 86 apartments was built and distributed in Kikinda and Nis, while 49 apartments were distributed in Zrenjanin, Kikinda, Pančevo, and Kraljevo. <p>-Value of the entire project is budgeted in the activities in which, for the first time, the funds from any project will be used in other activities (Activity primarily related to the source of funding). Therefore, the said amount refers to multiple of activities, not just the activity in which it was first mentioned.</p>	<p>-When it comes to activities that use resources from a particular project that has already been budgeted in the total amount in activities primarily related to the source of financing, for easier reading of the document, it is stated, in addition to the number of activities in which the financial aspect is shown, also the name and the amount of the fund but in brackets.</p>	

ACTIVITIES PRIMARELY RELATED TO SOURCE OF FINANSING- activities in which for the first time a certain source of funding are budgeted (Budget of the Republic of Serbia / EU sources / other sources) to which other activities would later be referred as well. When it comes to source of funding from EU sources or other sources, then the overall value (that will be also used in other activities) of the project is budgeted, but its financial presentation shall be displayed solely in activities primarily related to the source of financing.

In all activities where a certain international project is displayed as a source of funding, the gross value of the overall project is presented. Solely project of UNICEF has accurately determined value for each activity, considering that part of the activities are already being implemented.
